Bridge Design Details 2C October 2019
High Point and Low Point Formula

$$
\ell=\frac{\mathrm{G}_{1}}{\mathrm{R} / \mathrm{C}}
$$

$\ell$ - Length at high point or low point.
The elevation at any point along a curve is given by the following equation:
$\varnothing=G 1+R / C(\ell)$
$\ell=\frac{\mathrm{G}_{1}}{\mathrm{R} / \mathrm{C}}$
Examples:

Figure 2A.C. 1 Low Point (Sag Curve)

Figure 2A.C. 2 High Point (Crest Curve)
