

2022 SHOPP

State Highway Operation And Protection Program

**Fiscal Years
2022-23 through 2025-26**

Prepared by the California Department of Transportation
In accordance with Government Code Section 14526.5
California State Transportation Agency
Adopted by the California Transportation Commission

March 17, 2022

Gavin Newsom
Governor, State of California

Toks Omishakin
Secretary, California State Transportation Agency

Steven Keck
Acting Director, California Department of Transportation

EXECUTIVE SUMMARY

The 2022 State Highway Operation and Protection Program (SHOPP) is a four year program of projects that collectively improves the condition, operation, and sustainability of State Highway System (SHS) and associated transportation infrastructure in California. The SHOPP funds safety and condition improvements, damage repairs, and highway operational and modal improvements on the State Highway System. By continuously repairing and rehabilitating the SHS, the SHOPP protects the enormous investment that has been made over many decades to create and manage the approximately 16,000 miles SHS. The SHS includes all Interstate routes, numbered highway, and other state owned assets including bicycle and pedestrian facilities, culverts, Transportation Management Systems (TMS), safety roadside rest areas, and maintenance stations. The SHOPP also funds projects necessary to comply with the Americans with Disabilities Act (ADA) and stormwater control requirements. All projects funded by the SHOPP are limited to capital improvements that do not add new through highway lanes.

The SHOPP is fiscally constrained by the 2022 State Transportation Improvement Program Fund Estimate (Fund Estimate). The 2022 SHOPP does not include the recently enacted federal Infrastructure Investment and Jobs Act (IIJA) funds.

For the 2022 SHOPP, California Department of Transportation (Caltrans) will implement \$17.9 billion in projects over four years, covering Fiscal Years 2022-23 through 2025-26. A four-year summary of SHOPP investments is provided in **Table 2**. A more detailed 2022 Funding Summary is available in **EXHIBIT A: 2022 SHOPP Funding Summary** and the entire 2022 County Listing of Projects in **EXHIBIT E: 2022 SHOPP County Listing of Projects**.

Consistent with Senate Bill 486 (Chapter 917, Statutes of 2014), Caltrans submitted the proposed program of projects to the California Transportation Commission (Commission) on January 31, 2022, for Commission review and adoption. The Commission adopted the 2022 SHOPP at their meeting on March 17, 2022. The adopted SHOPP is due for submittal to the Governor and the Legislature no later than April 1, 2022.

The 2022 SHOPP is a performance-driven project portfolio built entirely by the principles of asset management. Projects in the 2022 SHOPP were developed under an asset management framework established through the California Transportation Asset Management Plan (TAMP) and implemented with the 2019

State Highway System Management Plan (SHSMP). Complete Streets was considered for all projects, where feasible to incorporate, as part of the SHOPP process. The SHSMP operationalizes the TAMP using Commission-adopted asset classes, performance measures, and targets under Senate Bill 486 (SB 486). Furthermore, the 2022 SHOPP includes projects that address condition improvements of the primary asset classes (i.e., pavement, bridge, drainage, and TMS) in supporting progress to meet 2027 performance targets established in Senate Bill 1 (SB 1) and by the Commission. The 2022 SHOPP performance measures for these primary asset classes are summarized in **Figure 1**.

Figure 1 – Expected 2022 SHOPP Performance Accomplishments

The TAMP identifies federal asset condition targets for pavement and bridges on the National Highway System (NHS). The TAMP also puts forth performance targets for eight supplementary asset classes in addition to the four primary asset classes on the SHS in alignment with the Commission’s 2017 TAMP Guidelines and subsequent actions. Projects in the 2022 SHOPP each help make progress towards meeting established performance targets.

The SHSMP integrates both federal and state-mandated targets and further expands the scope of asset management to 32 total performance objectives and targets. The primary focus of the SHSMP is to maintain the condition, safety, and service of the SHS. Caltrans also considers key cross-cutting focus areas identified throughout Caltrans policies and guidance and includes them in appropriate projects. Cross-cutting focus areas are considered and included at the project level, where feasible, and help Caltrans achieve broader strategic goals. The cross-cutting focus areas are Complete Streets, Environmental Stewardship, Freight, System Resiliency, and Climate Change. Project portfolios are developed

and updated quarterly in the [SHOPP Ten-Year Project Book](#)¹. All proposed new 2022 SHOPP projects not funded by reservations are listed in the SHOPP Ten-Year Project Book dashboard. The dashboard includes search features and mapping for improved transparency and engagement opportunities.

Table 1 outlines the ten-year goals to be achieved for the highway system for pavement, bridge, culverts, and TMS asset classes.

Table 1 – 2017 to 2027 Ten-Year Condition Estimates

Asset Class	Projected End of Plan Condition Relative to Current
Pavement	Achieve a pavement pothole and cracking Level of Service of 90 percent or higher by 2027.
Bridges	Not less than 98.5 percent of bridge area to be in good or fair condition by 2027. Fix not less than an additional 500 bridges by 2027
Culverts	Not less than 90 percent of culvert length to be in good or fair condition by 2027.
Transportation Management Systems (TMS)	Not less than 90 percent of TMS elements to be in good condition by 2027.

SHOPP projects also provide opportunities to address other vital State priorities such as equity and livability by the implementation of Complete Streets elements such as pedestrian and bicycle facilities, climate change considerations (reduction of transportation-related greenhouse gas (GHG) emissions, and measures to enhance the resilience of transportation assets to future climate stressors), zero-emission vehicles charging, and enhancements to wildlife connectivity and fish passage.

Caltrans is committed to making continuous improvements in implementing complete streets features to support walking, biking, and using transit on the SHS, as outlined in the newly adopted Director's Policy 37 (DP-37) on Complete Streets, for all future SHOPP cycles. Efforts in this area include Caltrans' policy, guidance procedures, and organizational structure changes. For instance, Caltrans

¹ https://dot.ca.gov/-/media/dot-media/programs/asset-management/documents/2022_q1_book_lf_12_22_21_v2_combined_mam_all.y.pdf

updates its design guidance for consistency with externally available sources at the Federal and national association levels. Furthermore, an improved dataset of bicycle and pedestrian facilities is helping to assess better the inventory and condition of these assets in the 2021 SHSMP. An analysis of the 2022 SHOPP project portfolio identifies that 47 percent of the projects include bicycle, pedestrian, or transit--focused features.

The 2022 SHOPP includes projects that carry out several climate action efforts. The SHOPP includes investments in bicycle, pedestrian, and transit features to provide low or no emission modal transportation choices. The SHOPP also contains projects that expand the zero-emission vehicle charging facilities. SHOPP projects further reduce emissions by using recycled materials, especially for large pavement projects. This SHOPP includes early work for some of the first sea-level rise adaptation projects involving the SHS. Other climate resiliency projects rebuild the SHS after storm events and fires with more resilient materials. Through these projects and actions, the SHOPP is helping to reduce the impacts of climate change and make the system more resilient to realized impacts.

Caltrans prepared the 2022 SHOPP per Government Code section 14526.5, Streets and Highways Code section 164.6, and the Commission SHOPP Guidelines. The 2022 SHOPP is the culmination of a multi-year development cycle that began with identifying SHS rehabilitation needs and priorities in the 2019 SHSMP. The 2022 SHOPP Project List is also consistent with the 2018 TAMP prepared per state and federal requirements.

An additional component of the SHOPP is the funding program referred to as the Minor Program. Over the four years of the 2022 SHOPP, the Minor Program will include \$1 billion to implement relatively low-cost (less than \$ 1.25 million) capital projects that meet all requirements for SHOPP eligibility. These funds enable Caltrans to quickly address small-scale needs beyond the scope of what can be managed by the Caltrans Maintenance Program. These projects are at a scale that does not necessitate an extensive project development process as is usually required for more costly and complex capital projects. Caltrans proposes the Minor Program of projects annually for Commission approval, and the Minor Program funding amount is included within the SHOPP total. The Minor Program is one aspect of the overall asset management approach and is consistent with the TAMP.

INTRODUCTION

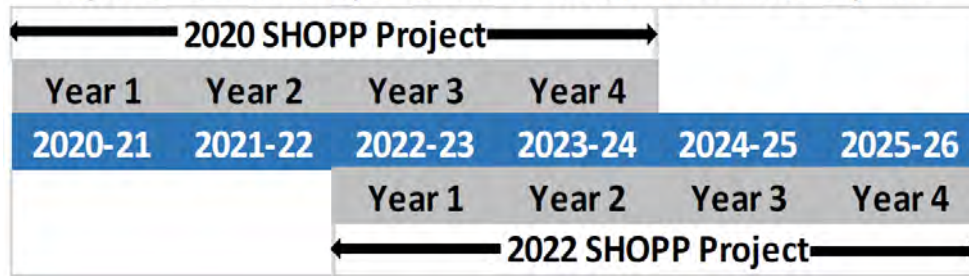

The California Department of Transportation (Caltrans) prepared the 2022 State Highway Operation and Protection Program (SHOPP) per Government Code section 14526.5, Streets and Highways Code section 164.6, Senate Bill 486 (Chapter 917, Statutes of 2014), Senate Bill 1 (SB 1) (Chapter 5, Statutes of 2017), California Transportation Commission (Commission) SHOPP Guidelines (June 2020) (**EXHIBIT D**: Commission SHOPP Guidelines (June 2020)), the State Highway System Management Plan (SHSMP), and the California Transportation Asset Management Plan (TAMP). The 2022 SHOPP also addresses related statutes, executive orders, and policies focusing on climate change considerations (reduction of transportation-related greenhouse gas (GHG) emissions and measures to enhance the resilience of transportation assets to future climate stressors), complete streets, wildlife habitat connectivity, environmental stewardship, freight, system resiliency, and other topics. All statutory requirements were addressed in the development of the 2022 SHOPP.

The SHOPP is the State's "fix-it-first" funding mechanism for the rehabilitation and reconstruction of all state highways and bridges, including Interstate highways; the supporting infrastructure for those facilities such as culverts, traffic management centers, safety roadside rest areas, and maintenance stations; and most importantly, to address safety and emergency repair needs. The 2022 SHOPP is a four-year program of projects that addresses needs for fiscal years 2022-23 through 2025-26. Though specified auxiliary lanes are eligible for SHOPP funding as operational improvements, SHOPP projects are prohibited from adding through highway lanes. The 2022 SHOPP is built entirely through the performance-driven asset management process.

SHOPP PROCESS

The SHOPP portfolio of projects is updated every two years, carrying forward projects programmed in the last two years of the preceding SHOPP and making those last two years of projects the first two years of projects in the new SHOPP illustrated in **Figure 2**. New projects are programmed in the year Caltrans estimates the projects can be delivered. All projects have a Project Initiation Document (PID) identifying the project's scope, outputs, estimated capital and support costs, and delivery schedule.

Figure 2 - Relationship between 2020 and 2022 SHOPP Cycles

The SHOPP programming cycle has four major elements:

- **SHSMP** - The SHSMP is updated by Caltrans every two years to describe and quantify the rehabilitation and reconstruction needs on the State Highway System (SHS) for ten years. The draft SHSMP is submitted to the Commission by February 15, and the final SHSMP to the Governor and Legislature by June 1 of odd-numbered years.
- **TAMP** - The TAMP presents the existing inventory and condition of current state highway infrastructure, asset performance targets, financial plans, investment strategies, a risk mitigation plan, life-cycle planning documentation, and identified areas of improvement. The TAMP is updated every 4 years beginning in 2018.
- **Fund Estimate** - The programming cycle's fiscal capacity is developed by Caltrans and approved by the Commission to issue the 2022 State Transportation Improvement Program Fund Estimate (Fund Estimate) that forecasts the amount of funding available each year for the four-year estimate period of the SHOPP. The Commission-adopted 2022 Fund Estimate (adopted August 2021) provides a total available programming capacity of approximately \$4.3 billion per year for the 2022 SHOPP four-year period.
- **2022 SHOPP** - Identifying a four-year program of capital projects that respond to the goals/targets identified in the 2019 SHSMP, are within the fiscal constraints specified in the Fund Estimate, and are selected to achieve the asset performance target outcomes identified in the adopted 2018 TAMP. This set of projects constitutes the four-year SHOPP.

Caltrans provides a draft of the SHOPP project list to Regional Transportation Planning Agencies (RTPA's) for review and comment before submitting the proposed SHOPP to the Commission. The Commission reviews the submitted SHOPP, holds at least two hearings, and may request clarifications or modifications to the document, program, or projects. Caltrans addresses comments received from the RTPA's and others regarding the SHOPP. The Commission ultimately adopts the SHOPP upon a finding of consistency with the TAMP and then submits the adopted SHOPP to the Governor and the Legislature. Caltrans develops and implements the projects identified in the adopted SHOPP consistent with the respective programming documents' scope, schedule, and cost.

CONSISTENCY WITH TRANSPORTATION ASSET MANAGEMENT

The 2022 SHOPP is comprised of a portfolio of 733 projects (217 new and 516 “carryover” projects from the 2020 SHOPP), spanning the four fiscal years 2022-23 through 2025-26. More than half of these projects focus on condition improvements across four primary asset classes (i.e., pavement, bridge, drainage, and Transportation Management Systems) (TMS), supporting Caltrans's progress in meeting the required 2027 performance targets set forth by the Commission and outlined in SB 1.

Projects in the 2022 SHOPP were nominated and developed under an asset management framework established through the [California 2018 TAMP](#)² and implemented with the [2019 SHSMP](#)³. The SHSMP operationalizes the TAMP using Commission-adopted asset classes, performance measures and targets under SB 486.

The portfolio of projects in the 2022 SHOPP makes progress towards meeting the SB 1 targets. The TAMP identifies federal asset management targets for pavement and bridges on the National Highway System (NHS). The TAMP also puts forth performance targets for eight supplementary asset classes in addition to the four primary asset classes on the SHS in alignment with the Commission's 2017 TAMP Guidelines.

² <https://dot.ca.gov/programs/asset-management/california-transportation-asset-management-plan>

³ <https://dot.ca.gov/programs/asset-management/state-highway-system-plan>

The SHSMP integrates both federal and state-mandated targets and further expands the scope of asset management to 32 total performance objectives and targets. The local Caltrans districts develop project portfolios spanning the 10-year plan period to achieve the required performance within fiscal constraints. The districts manage these project portfolios to adapt to project-level scope changes, schedule adjustments, and other factors to ensure that 10-year performance targets can be achieved. Complete project lists and details are published and updated quarterly in the [SHOPP Ten-Year Project Book](#). All proposed new 2022 SHOPP projects have been listed in the publicly available Project Book for a minimum of six months and up to 2.5 years, depending on the project.

To measure progress toward meeting the defined performance targets, Caltrans develops an Annual Performance Benchmarks Report to measure progress made for each of the four primary assets towards achieving the 2027 targets.

Caltrans has confidence that the 2022 SHOPP is fully aligned and consistent with the TAMP through this strategic asset management process.

[2022 SHOPP COMPARISON TO STATE HIGHWAY SYSTEM MANAGEMENT PLAN](#)

Table 2 summarizes 2022 SHOPP projects and planned reservations against the 2019 SHSMP targets. A greater detailed summary of the 2022 SHOPP, by fiscal year, is shown in **EXHIBIT A: 2022 SHOPP Funding Summary**.

**Table 2 - Comparison of 2022 SHOPP Programming to the 2019 SHSMP
Fiscal Years 2022-23 through 2025-26***

Program Categories	2022 SHOPP Projects & Reservations (in Millions)	40% of 10 yr Constrained 2019 SHSMP* (in Millions)
Primary Assets		
Pavement	\$5,866	\$7,160
Bridge	\$2,116	\$2,791
Culvert(s)	\$809	\$962
TMS	\$972	\$863
Supplementary Assets	\$1,068	\$1,264
Project Objectives		
Major Damage (Emergency Opening)	\$1,794	\$955
Major Damage (Permanent Restoration)	\$795	\$700
Collision Reduction	\$2,636	\$2,031
Mandates	\$340	\$527
Mobility	\$262	\$320
Roadside Preservation	\$64	\$141
Protective Betterments	\$30	\$60
Multiple Objective	\$56	\$0
Minor Program	\$1,000	\$960
Long Lead (New)	\$54	\$115
Total:	\$17,860	\$18,848
*Excludes Proposition 1B bond funds. Totals shown reflect programmed amounts and not the total project cost. Not all projects are fully funded.		
Note: The SHOPP is developed in thousands and rounded for this table. Numbers may not add due to rounding.		

Each project in the 2022 SHOPP contains a primary asset or “anchor” asset and associated performance measure. The anchor performance measure represents the project output and is included in a project’s individual listing “box” (**EXHIBIT E: 2022 SHOPP County Listing of Projects**). Performance measures range from lane-miles of distressed pavement restored for roadway preservation projects to collisions reduced for safety projects.

However, secondary “satellite” project performance measures are often part of a project’s scope and are captured but not reported in the project listing. Satellite asset performance is available through the project book dashboard. **Table 3** summarizes the 2022 SHOPP investment by Anchor performance measure objective, although each of these anchor objectives will include costs for satellite objectives as well.

Table 3 - 2022 SHOPP Investments by Objective

Anchor Objective	Programmed Project Cost & Reservations* (in Billions)	Percent of SHOPP
Pavement	\$5.9	34.9%
Bridge	\$2.1	12.6%
Culvert(s)	\$0.8	4.8%
TMS	\$1.0	5.8%
Major Damage (Emergency Opening)	\$1.8	10.7%
Major Damage (Permanent Restoration)	\$0.8	4.7%
Safety	\$2.2	12.9%
All Others	\$2.3	13.6%
Grand Total*	\$16.8	100.0%
*Totals shown reflect programmed amounts and not the total project cost. Not all projects are fully funded. Grand Total excludes the Minor Reservation and New Long Lead PA&ED cost.		
Note: The SHOPP is developed in thousands and rounded for this table. Numbers may not add due to rounding.		

PRIMARY ASSET CLASS IMPROVEMENTS IN THE 2022 SHOPP

The 2022 SHOPP will deliver condition improvements across the four primary asset classes aligned with state and federal mandated performance targets. Notably, these projects will address the following:

- 6,347 lane miles of fair and poor condition pavement
- Fair and poor condition bridges representing 9.2 million square feet of deck area
- Rehabilitate 397,724 linear feet of culverts
- 2,803 poor condition TMS elements

SHOPP DEVELOPMENT AND PLANNING CYCLES

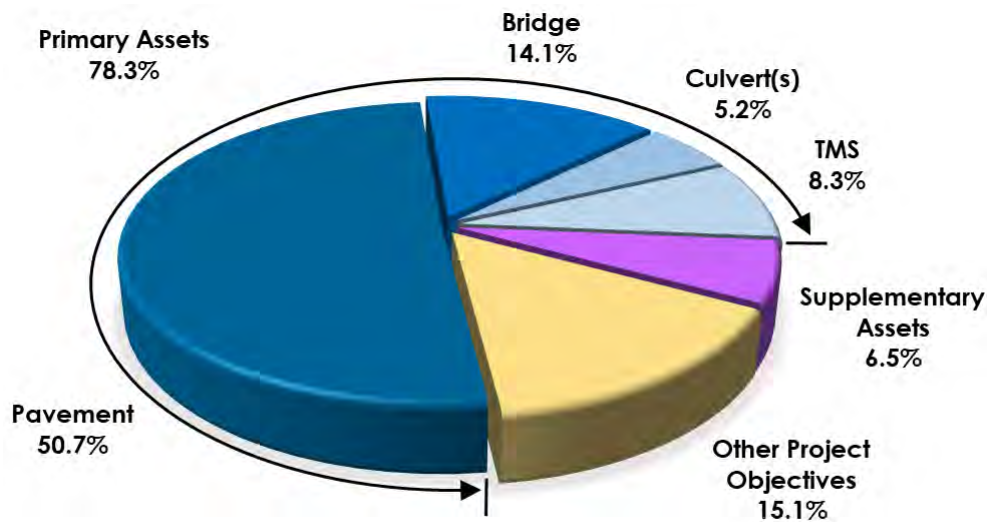

Caltrans engages in a comprehensive planning process to select projects for the SHOPP Program. Transportation needs such as pavement, bridge, TMS, and culvert repairs are bundled into projects to utilize SHOPP funding efficiently. Proposed project portfolios are aligned to meet performance targets and financial constraints. Projects within the portfolio begin with planning and the development of a PID.

The PID identifies the scope, schedule, and cost for each capital project and is the basis for determining the amount of funding being requested for programming each project in the SHOPP. During PID development, various components and analyses are integrated into the project, such as active transportation, risk management, and other topics. Caltrans also coordinates with regional and local partners. Coordination with partners contributes to the identification of opportunities or potential risks. This coordination considers local capital improvement programs, active transportation programs, and other potential areas to collaborate through scope, cost, or schedule.

SHOPP FUNDING

The State Highway Account (SHA), Federal Highway Trust Fund (HTF), and Road Maintenance and Rehabilitation Account (RMRA) are the funding sources for the SHOPP. The Commission SHOPP Guidelines (June 2020) ensure the accountability and transparency outlined in SB 1. Furthermore, project outputs were incorporated into the Commission SHOPP Guidelines to promote efficiency, accountability, and performance for invested funding. **Figure 3** displays the percent of projects in the primary and supplementary asset classes based on total project cost.

Figure 3 – Percent of Projects in Asset Management Classes

CAPITAL OUTLAY AND CAPITAL OUTLAY SUPPORT

Capital Outlay Support (COS) represents staff time associated with the development, delivery, and oversight of Caltrans' capital outlay SHOPP projects. COS is divided into the following component phases: Project Approval and Environmental Document (PA&ED); Plans, Specifications, and Estimate (PS&E); right-of-way support; and construction support. Per Government Code 14526.5 (g) (effective July 1, 2017) and per the current Commission SHOPP Guidelines, Caltrans must request individual allocations by component from the Commission for each individual COS phase and construction capital. **Figure 4** shows the percentage distribution of the 2022 SHOPP among COS component phases.

Figure 4 – 2022 SHOPP Distributed Among Project Components

LONG LEAD AND CONTINGENCY PROGRAMMING

Long Lead and Contingency projects help ensure that the State fully utilizes its available federal transportation funding. On June 15, 2000, Commission resolution G-00-13 provided Caltrans with a means to commence project delivery efforts on SHOPP Long Lead projects, which require more than four years to develop due to complex environmental and preliminary engineering work. The 2022 SHOPP contains 35 Long Lead projects valued at \$1.58 billion. These projects are authorized to start work on the Project Approval and Environmental Document (PA&ED) phase, as shown in **EXHIBIT F: 2022 SHOPP Long Lead Projects**.

The Commission further authorized Caltrans to program Contingency Projects for preliminary engineering development only, when appropriate, thus creating projects that address performance goals without committing SHOPP resources to construction capital and support prematurely before the resources are needed. Programming Contingency Projects enable the maximum currently available capital funding to be dedicated to projects ready for construction rather than having funding held aside for years as complex projects get ready for construction. The 2022 SHOPP contains 64 contingency projects valued at \$4.4 billion included within the 2022 SHOPP project listing in **EXHIBIT E: 2022 SHOPP County Listing of Projects**. A “shovel-ready” contingency project can quickly be proposed

for funding should additional transportation revenues be provided or to replace a project that is delayed or otherwise reduced in cost, making funding available within the fiscally constrained Fund Estimate period.

INNOVATION AND SUSTAINABILITY

SB 1 contains provisions for sustainability, innovation, resiliency, and Complete Streets on SHOPP projects. These provisions in Streets and Highways Code Section 2030 Subdivision (c)-(f) require Caltrans to use advanced construction technologies and material recycling techniques, and to include technology and communications systems to accommodate zero-emission and autonomous vehicles, wherever feasible and cost-effective. In addition, the provisions require SHOPP projects, where feasible, to include Complete Streets elements, such as bicycle lanes and sidewalks, that improve safety for all users of the highway system. Also, SB 1 requires Caltrans to ensure that transportation assets are protected and better adapted to future extreme weather and other climate impacts.

Taken together, these new SB 1 requirements of the SHOPP will result in a highway system that is more reliable and safer for all users of the system, including bicyclists, pedestrians, and transit riders as well as automobile and truck travelers. At the same time, the methods and materials utilized when rehabilitating the highway system will be less impactful than traditional practices and will create more resilient and sustainable facilities as necessary repairs are made. The highway system is being remodeled to meet modern needs as essential repairs are made.

In addressing these provisions from SB 1, Caltrans is building on many activities already in practice to utilize sustainable approaches and innovative processes on SHOPP projects. Below are some of the current sustainability and innovation activities underway through SHOPP projects.

- Making multimodal transportation accessible for all Californians by providing safe, efficient, and cost effective, pedestrian, bicycle, and transit infrastructure.
- Minimize transportation impacts on climate, air quality, water quality, and wildlife.

- Incorporating recycled materials into the asphalt and concrete mixes to extend the life of the pavement and reduce the emissions generated in manufacturing the materials, including the pilot use of Environmental Product Declarations to evaluate emissions from construction materials and current research on limestone constituents in pavement mixes.
- Recycling pavement on the job site minimizes GHG from trucking materials to and from the job site and eliminates waste.
- Using reflective sign sheeting to eliminate the need for lighting.
- Specifying Light Emitting Diode (LED) traffic signals and highway lighting can reduce energy consumption by up to 50 percent.
- Deploying SMART Irrigation Controllers to tailor water usage for landscaping based on weather conditions to conserve water.
- Using recycled water for roadside landscape watering where possible.
- Designing projects with functional landscaping features that collect stormwater and reduce urban heat island effects.
- Installing electric vehicle fast-charging stations at Caltrans-owned sites.
- Updating the project development process to track progress toward designing projects that include pedestrian and bicycle facilities.
- Reducing the energy, water, and materials consumed in some of Caltrans' buildings and facility operations.

FISH PASSAGE

Caltrans is required to remediate Salmon and Steelhead Trout barriers on the State Highway System per California Streets and Highway Code 156.1-156.5. The 2022 SHOPP includes identified maintenance and replacement needs at culverts and bridges that provide opportunities to remediate existing barriers as the transportation improvement work is done. Caltrans has included a new inventory of priority Salmon and Steelhead Trout barriers in the Asset Management Tool (AMT), which improves opportunities to identify overlapping transportation and barrier remediation needs. This new fish passage priority AMT inventory helps to ensure that transportation projects adequately scope needs and requirements of fish passage barrier improvements as the projects move through the planning and project delivery process.

CLIMATE CHANGE

The State of California has been proactive regarding climate change policy and legislation. Several bills and executive orders have been enacted that have established and required consideration of the state's climate goals to reduce GHG emissions and adapt the transportation system to be more resilient to climate impacts such as extreme weather events. The California Transportation Agency has emphasized the importance of climate considerations with developing the Climate Action Plan for Transportation Infrastructure (CAPTI), which will guide transportation investment decisions moving forward.

Under Executive Order EO N-19-19 and the Sustainability provisions of The Road Repair and Accountability Act of 2017 (Senate Bill 1) Section 2030 (e), Caltrans must consider climate change in all investment decisions. Caltrans addresses this by considering future climate conditions throughout the project development process.

In coordination with state and federal agencies and research institutions, Caltrans has completed Vulnerability Assessments and associated Adaptation Priority Reports for each Caltrans District. These assessments focus on the SHS and help identify vulnerabilities due to climate change impacts, including precipitation, temperature, wildfire, storm surge, and sea-level rise.

Caltrans considers the potential long-term impacts of climate changes when evaluating the design and or alignment alternatives. SHOPP projects incorporate more resilient designs for long-life projects in anticipation of increased future climate stressors.

Furthermore, implementing climate change elements into asset management performance objectives will ensure consistent inclusion of risk-based climate concerns in multi-objective SHOPP projects. These actions will help Caltrans reduce maintenance costs and keep the SHS functioning effectively and efficiently.

EQUITY AND LIVEABILITY

The Asset Management approach utilized for the SHOPP is driven by performance. The performance targets are consistent from one location to the next within California. This performance-driven approach will drive investment to the areas with the greatest need. Following the performance approach will ultimately lead to equal condition levels in all locations over time.

Caltrans works towards advancing equity and livability goals through activities in SHOPP projects under the Americans with Disabilities Act (ADA) Pedestrian Infrastructure and Complete Streets performance objectives. These objectives shape transportation investment decisions to ensure that the SHS is accessible, safe, and efficient for all users, particularly disadvantaged and under-served communities, across an integrated multimodal transportation system that includes vehicle, bike, and pedestrian facilities.

Caltrans also proactively engages with affected community groups focusing on those in disadvantaged and under-served communities so that their transportation-related needs and concerns are addressed. By Caltrans recognizing disparities and addressing them in transportation investments and new projects, vibrant and livable places are developed for all Californians.

This strategic goal focuses the department's efforts to:

- Avoid and work to address transportation-related disparities in underserved communities on all new projects.
- Plan and design transportation facilities to support vibrant, livable places, focusing on addressing the needs and concerns of underserved communities.
- Collaborate with partner agencies to make equity and inclusion central in funding decisions.

COMPLETE STREETS – MEETING THE NEEDS OF ALL MODES

Caltrans implemented project level complete streets assessments during project scoping on all candidate projects. The current project initiation guidance requires that all SHOPP projects, except for Major Damage - Permanent Restoration (131) and SHOPP Safety (010) projects, are evaluated for the need and practicality of including bicycle, pedestrian, and transit features. This evaluation is documented in the PID and revisited at every major milestone. In addition, Caltrans has

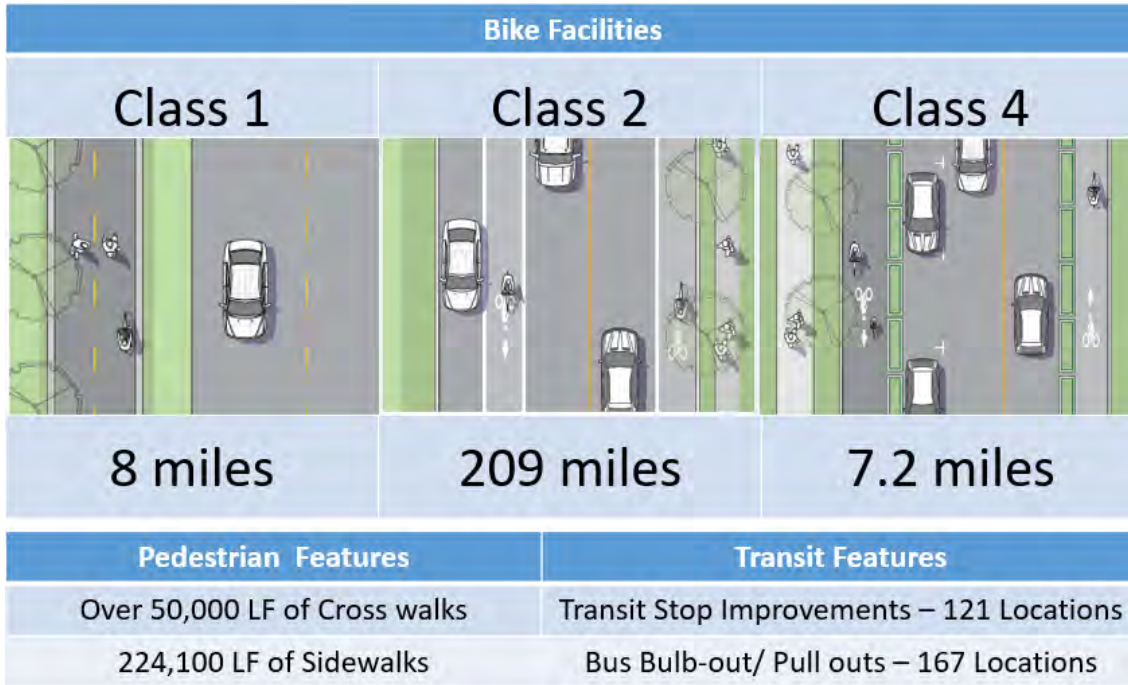

developed further initiatives with the new Caltrans Director's Policy 37 - Complete Streets that support the incorporation of complete streets components into all phases of project planning and development. This policy will be implemented into all future SHOPP projects, where feasible.

Caltrans' new Director's Policy 37 (DP-37) recognizes that walking, biking, transit, and passenger rail are integral to the Caltrans vision of delivering a brighter future for all through a world-class transportation network. Additionally, Caltrans recognizes that streets are not only used for transportation but are also valuable community spaces. Accordingly, in locations with current and or future pedestrian, bicycle, or transit needs, all transportation projects funded or overseen by Caltrans will provide comfortable, convenient, and connected complete streets facilities for people walking, biking, and taking transit or passenger rail unless an exception is documented and approved. This policy establishes Caltrans' organizational priority to encourage and maximize walking, biking, transit, and passenger rail as a strategy to meet state climate, health, equity, and environmental goals and foster socially and economically vibrant, thriving, and resilient communities. To achieve this vision, Caltrans will maximize design flexibility to provide context-sensitive solutions and networks for travelers of all ages and abilities.

Caltrans uses an asset management tool to track project-level accomplishments included in all SHOPP projects. This tool allows project-level improvements to be summarized across the SHOPP, including complete streets features. Furthermore, a publicly posted virtual project book is updated quarterly and includes all SHOPP projects. Many of the complete streets elements on individual projects are made part of the virtual project book for public review.

Within the 2022 SHOPP, Caltrans strengthens its commitment to integrate bicycle, pedestrian, and transit improvements into the transportation network. 47 percent of all 2022 SHOPP projects include one or more complete streets features. The 2022 SHOPP comprises more than 52 miles of sidewalks and crosswalks and over 288 transit features such as transit stop improvements, bulb-outs, and pull-outs.

Figure 5 – Expected 2022 SHOPP Complete Streets Improvements

LIFE CYCLE PLANNING

The continuing expansion of Asset Management implementation includes developing tools to provide life-cycle planning capabilities for SHOPP projects. Project life cycle planning considers the expected treatment schedules of Caltrans' assets to guide long-term strategic decision making. The process includes identifying typical treatments for each primary asset class and defining the expectations of a given typical treatment life in years. The analysis helps determine the most cost-effective long-term actions when paired with costs over time.

Table 4 provides a listing of the common treatments that are utilized for pavement, bridges, culverts, and TMS elements and their respective useful life ranges:

Table 4 - Core-Asset Treatment Useful Life Estimates

Asset Classes	Treatment	Typical Treatment Life (Years)
Pavement		
	Thick Asphalt Overlay	4-10
	Slabs Replacement	5-10
	Medium Asphalt Overlay	10-20
	Thick Asphalt Overlay	20-40
	Asphalt Lane Replacement	20-40
	Concrete Lane Replacement	40-55
Bridges		
	Deck Overlay	15-30
	Deck Rehabilitation	20-30
	Replacement	60-80
	Rail Upgrade	30-50
	Scour Mitigation	30-50
	Seismic Mitigation	30-50
Culverts/Drainage		
	Culvert Lining	30-50
	Replacement	40-60
	Pump Replacement	30-50
Transportation Management System Elements		
	Replace Loop Detectors	8-10
	Replace Electrical Controllers	10-15
	Install Changeable Message Sign Panel	10-15
	Install New CCTV	8-12

RESERVATIONS

The 2022 SHOPP includes reservations that fund both Capital Outlay and COS based on historical expenditures for emergency repairs, safety projects, and other unforeseen immediate needs. These needs occur between programming cycles, and these reservations allow Caltrans to bring the projects to the Commission for amendment into the SHOPP between bi-annual programming cycles.

The following funding reservations, as shown in **EXHIBIT A: 2022 SHOPP Funding Summary**, are being held to provide funding to achieve anticipated future needs that will require action, but where specific projects have not yet been defined.

- **Major Damage (Emergency Opening):** Reservations are for unforeseen Major Damage Emergency (201.130) projects.
- **Major Damage (Permanent Restoration):** Reservations are for unforeseen Major Damage Restoration (201.131) projects.
- **Collision Reduction:** Reservations are for Safety Improvement (201.010) projects.
- **Mandates:** Reservations are for Relinquishment (201.160) projects to transfer ownership of state highways primarily serving local jurisdictions to those local jurisdictions.
- **Minor Program:** An annual reservation is held for the Minor program. The SHOPP Minor Program is an annual program to address short-term, low-cost project needs. In developing their annual portfolio of minor projects, each Caltrans District sets priorities and selects projects appropriate to the region's needs.

REGIONAL TRANSPORTATION PLANNING AGENCY COORDINATION

In 2013, the Self-Help Counties Coalition suggested enhanced communication and coordination in the SHOPP program development process. Specifically, the focus was on earlier information regarding what SHOPP projects are being proposed, programmed, and ultimately delivered. Caltrans developed three specific action steps to enhance earlier communications, covering planning, programming, and delivery. These steps are in addition to statutory requirements that direct Caltrans to provide the draft SHOPP to transportation agencies for an opportunity to review and comment.

- **Planning Process:** Caltrans Districts share their two-year PID work plan list of projects candidates for the next SHOPP programming cycle. This is the opportunity to coordinate proposed SHOPP projects with regionally-funded projects to synchronize timeframes, maximize benefits, and minimize impacts to the traveling public.
- **Programming Process:** Districts share with the regions which projects they will be submitting as candidate projects for the upcoming SHOPP. This is a second opportunity to coordinate and confer with local partners to synchronize timeframes, maximize benefits, and minimize impacts to the traveling public. The Division of Financial Programming will circulate the proposed four-year program of projects to the RTPAs for review and comment. Comments received will be incorporated into the final SHOPP programming document.
- **Status Updates:** Districts will update the RTPA's on a quarterly or semi-annual basis on (1) the list and status of PID projects being developed as well as (2) the status of funded SHOPP projects currently in delivery. At a minimum, Districts will provide a summary-level project delivery status on all currently programmed SHOPP projects semiannually.

With the implementation of asset management, complete project lists and details are published and updated quarterly in the [SHOPP Ten-Year Project Book](#). All proposed new 2022 SHOPP projects that are not funded by reservations, such as emergency opening projects or safety improvements, have been listed in the publicly available Project Book for a minimum of six months and up to 2.5 years, depending on the project.

On December 22, 2021, the Proposed 2022 SHOPP project listing was provided to regional transportation partners for review and comment. Caltrans will further expand its SHOPP engagement efforts to develop subsequent SHSMP and SHOPP documents. Formal comments received regarding the draft 2022 SHOPP and Caltrans responses are provided in **EXHIBIT C: 2022 SHOPP Regional Transportation Planning Agency Comments**.

PROJECT LISTINGS

2022 SHOPP projects are listed by County in **EXHIBIT E**

Projects are sorted into the following ten categories for each county:

1. Major Damage (Emergency Openings)
2. Major Damage (Permanent Restoration)
3. Collision Reduction
4. Mandates
5. Bridge Preservation
6. Roadway Preservation
7. Mobility
8. Roadside Preservation
9. Facilities
10. Multiple Objective

2022 State Highway Operation and Protection Program Public Comments

Comment submitted by:

Michael Dour

City of Roseville

1. SR 65/Blue Oaks Interchange Bike Improvements - Over the past year we have been working with Caltrans staff to design what we consider a much-needed complete streets improvement to the SR 65/Blue Oaks interchange. This interchange is one of the most challenging interchanges for bicyclists who are traveling across SR 65. There are key employment areas on both the west and east sides of the highway, but bicyclists are challenged by high speeds and multiple on-ramps as they cross the interchange, particularly from west to east. The project we have developed in coordination with Caltrans staff would add a protected bicycle signal phase for the southbound Hwy 65-on-ramp and other improvements to enhance west to east travel across the interchange. The budgeted cost is \$124,000. The project is ready for implementation and we think it would be a very good candidate for the FY22 SHOPP CS cycle.

2. Taylor Road Park-N-Ride Improvements – The Taylor Road Park-N-Ride (PNR) lot is a 300-space lot owned by Caltrans and is South Placer's busiest and most used PNR lot. This lot is the primary stop for Roseville Transit and Placer County Transit commuter buses carrying passengers to Downtown Sacramento. Pre-pandemic there were a total of 28 buses serving the site daily (14 in the morning and 14 in the evening). The current total is 17 per day, but we expect that # will increase as we climb out of the pandemic. The Caltrans PNR lot does not meet ADA standards and needs to be upgraded, and in addition the transit stop is in poor condition and should be upgraded as well. We have started discussions on this project with Caltrans District 3 staff. There may be other funding sources for the upgrades, but it may be worthy of inclusion on the SHOPP CS program with an outlook to FY24. Since this project is still in preliminary planning stages, we do not have a cost estimate yet available.

Caltrans Response to the City of Roseville:

Thank you for commenting on the Proposed 2022 State Highway Operation and Protection Program (SHOPP) project list. The Department of Transportation (Caltrans) staff look forward to working with you in the future in making improvements to SR 65/Blue Oaks Interchange and Taylor Road Park-N-Ride. Below are responses to your comments.

1. Caltrans will work with the City of Roseville and PCTPA in contributing to the City's project. While not a candidate for the 2022 SHOPP there are other means to help get this project completed earlier than programming it in the 2022 SHOPP.
2. Caltrans will explore potential opportunities to address ADA deficiencies at Taylor Road Park and Ride and will work with Roseville Transit, Placer County Transit and PCTPA.

2022 State Highway Operation and Protection Program Public Comments

Comment submitted by:

Miki Tsubota – Director of Public Works/City Engineer

City of Brentwood

Regarding 04-Contra Costa-4, R29.0/R44.4, 2033N, 0419000450, 201.121 Pavement Rehabilitation (CAPM): There is strong support for this particular project from both the Brentwood City Council as well as the Brentwood community. Pavement rehabilitation and repair costs become exponentially higher as the pavement continues to degrade. As such and in an effort to save money and improve the quality of life along the State Route 4 corridor, we respectfully request every effort be made to expedite this project. Feel free to contact me if there is anything we can do to assist. Thank you.

Caltrans Response to the City of Brentwood:

Thank you for commenting on the Proposed 2022 State Highway Operation and Protection Program (SHOPP) project list. The Department of Transportation (Caltrans) appreciates Brentwood City Council and Brentwood community's support of Project ID 0419000450 (EA 04-0AA19). The referenced pavement rehabilitation project covers more than 15 miles of State Route 4. The proposed project scope includes repaving the roadway with Rubberized Hot Mix Asphalt (RHMA). Other improvements include upgrading intersections within the project limits to meet ADA standards and improving existing drainage systems on multiple locations. The environmental study for these improvements requires coordination with external agencies and is expected to take up to 18 months to complete. With railroad involvement, a lengthy right of way coordination is also expected. The current schedule in the proposed 2022 SHOPP shows a Fiscal Year (FY) 2024-2025 delivery took these factors into consideration. The project team will explore advancing the delivery of the project and will continue to monitor to ensure the facility is safe and operational until the completion of the rehabilitation.

2022 State Highway Operation and Protection Program Public Comments

Comment submitted by:

Joe Young – President of Vineyards at Marsh Creek Owners Association
Contra Costa County

Project 04-Contra Costa – 4, Page 37

As President of the Vineyards at Marsh Creek Owners Association, I am submitting this comment on behalf of the 1800 Brentwood residents of the VMCOA being impacted by the unacceptable noise level along SR4 between Balfour Road and Marsh Creek Road.

The SR-4 pavement rehabilitation portion of this project from Balfour Rd to Marsh Creek Road should be accelerated and construction should be started much earlier than the proposed 11/2/2025.

Currently there is a significant noise problem on this section of the road. The EIR for this section of SR-4 committed to a 60 dBA Ldn limit as did the EIR for the Vineyards at Marsh Creek Development and as required by the Brentwood General Plan. A recent sound study conducted by the City of Brentwood has verified that the noise levels exceed 60 dBA Ldn.

The current poor condition of this section of the roadway and the lack of a well maintained sound absorbing (rubberized) asphalt pavement as specified in the EIR are the primary contributors to the failure to meet the EIR noise mitigation requirements.

Prompt repair of this section of the roadway by resurfacing with the best available noise absorbing pavement will significantly improve this noise situation and most likely bringing the noise level into compliance with the EIR commitments.

We respectfully request an acceleration of construction for this project or at least for the resurfacing work between Balfour and Marsh Creek Roads.

Caltrans Response to the Vineyards at Marsh Creek Owners Association:

Thank you for commenting on the Proposed 2022 State Highway Operation and Protection Program (SHOPP) project list. The referenced pavement rehabilitation Project ID 0419000450 (EA 04-0AA19), covers more than 15 miles of State Route 4. The proposed project scope includes repaving the roadway with Rubberized Hot Mix Asphalt (RHMA), which is expected to provide some noise reduction benefit. Caltrans will coordinate with the Contra Costa Transportation Authority, which is

the appropriate local transportation agency, to address any concerns regarding noise or noise attenuation.

Other improvements include upgrading intersections within the project limits to meet ADA standards and improving existing drainage systems on multiple locations. The environmental study for these improvements requires coordination with external agencies and is expected to take up to 18 months to complete. With railroad involvement, a lengthy right of way coordination is also expected. The current schedule in the proposed 2022 SHOPP shows a Fiscal Year (FY) 2024-2025 delivery took these factors into consideration. The project team will explore advancing the delivery of the project and will continue to monitor to ensure the facility is safe and operational until the completion of the rehabilitation.

RE: Comments on Draft 2022 SHOPP Project List

Dear Mr. Anderson

Thank you for the opportunity to comment on the Draft 2022 State Highway Operation and Protection Program (SHOPP). The Metropolitan Transportation Commission (MTC) has supported, advocated for, and applauds the state's performance-based "Fix it First" infrastructure program.

MTC appreciates our decades-long partnership with Caltrans District 4 on numerous significant projects aimed at improving safety and mobility throughout the nine-county San Francisco Bay Area. Furthermore, MTC values working together with Caltrans to ensure that limited resources can be used by state, regional, and local agencies strategically and effectively, to achieve our mutual goals of improving safety and mobility throughout the region. The Department's investments (including SHOPP-funded projects) in Transportation Management System (TMS) and regional communications are also critical for providing well-performing, seamless transit operations on the region's freeways – an essential strategy for reduction of greenhouse gas emissions and vehicle miles traveled recognized in CAPTI, CTP 2050 as well as the Bay Area's "Bay Area Transit Transformation Action Plan" and regional long range plan Plan Bay Area 2050.

MTC applauds the Department for its continuing commitment to TMS projects that serve both the traveling public as well as the staff of the Department's Transportation Management Centers, who monitor traffic and support incident clearance. Over the past three SHOPP cycles, the Department has continued to increase its budget commitment to TMS, from 4.4% in 2018 to 7.3% in 2020 to 8.4% in the draft 2022 SHOPP. Given the Department's performance goal of maintaining a state of good repair for 90% of all TMS elements, MTC appreciates this increased SHOPP funding commitment for TMS infrastructure. Importantly, MTC strongly supports the Department in seeking critical additional funding (e.g., Bipartisan Infrastructure Legislation) to ensure ongoing resources dedicated to both preventative and corrective maintenance of existing and new TMS infrastructure. Such resources are essential to keep SHOPP-funded TMS elements in a state of good repair.

DocuSign Envelope ID: 5DB6790E-951D-4619-9B22-A34019D4FF54

MTC appreciates Caltrans' inclusion of communications infrastructure projects as these projects serve as the foundation to TMS and other transportation technology projects. MTC values working in concert with Caltrans District 4 on regional telecommunications projects (e.g., I-880 and completing the fiber ring around the San Francisco Bay). Importantly, as with TMS, MTC also strongly supports the Department seeking additional funding needed to maintain existing and new communications infrastructure. While the installed fiber will yield significant cost savings for the Department as it reduces reliance on utility services, maintenance of the communications network will need to be scoped and resourced to ensure that this significant investment is fully protected.

Given the major SHOPP 2022 projects, as well as numerous regional and local projects, the need for coordination remains essential. As an example, over the coming years, Bay Area Express Lane operators will be completing projects on I-80 Solano and US 101 San Mateo, installing significant communications and tolling infrastructure; this will require close coordination between regional and local agencies and Caltrans. The more that Caltrans and the Express Lane agencies can coordinate during project development, implementation, and construction, the better our agencies can keep each other mutually informed of relevant project developments and possible opportunities within the same geographic limits. This will be essential to avoid duplicate or conflicting design and construction, as well as streamline costs and schedules, where possible. We look forward to our ongoing coordination on these, as well as numerous other projects throughout the San Francisco Bay Area.

Lastly, we wish to highlight that the seven state-owned Bay Area toll bridges are not included in the state asset management plan or the SHOPP. The Bay Area Toll Authority (BATA) partners with Caltrans to maintain the bridges, and we are launching a comprehensive toll bridge asset management program modeled on best practices including the Department's asset management program. These bridges are critical transportation assets that are maintained and rehabilitated by toll revenue. However, BATA has experienced grievous toll losses associated with the pandemic and has directed staff to explore new revenue opportunities to compensate. We look forward to partnering with the state in exploring other funding opportunities, in particular opportunities to leverage the significant infusion of formulaic and competitive Bipartisan Infrastructure Legislation funds available for bridge rehabilitation.

Thank you once again for including MTC in the SHOPP process and for providing this opportunity to comment. Please feel free to contact me or Mario Ung (mung@bayareametro.gov) of my staff should you have any questions.

Sincerely,

DocuSigned by:

Andrew B. Fremier

Deputy Executive Director, Operations

cc: David Ambuehl, Chief Deputy District Director, Caltrans District 4
Tanisha Taylor, Deputy Director, California Transportation Commission

Caltrans Response to Metropolitan Transportation Commission:

Thank you for commenting on the Proposed 2022 State Highway Operation and Protection Program (SHOPP) project list. The Department of Transportation (Caltrans) appreciates the Metropolitan Transportation Commission's (MTC's) comments and interest in the proposed 2022 SHOPP. Caltrans will continue to partner with MTC to deliver transportation improvements to protect, preserve, and rehabilitate the State Highway infrastructure throughout all nine Bay Area counties.

Nicole Cheng

Non-profit Statewide network – Climate Plan

California Department of Transportation
1120 N Street
Sacramento, CA 95814
Via Microsoft forms and email: SHOPP@dot.ca.gov

Re: 2022 State Highway Operation and Protection Program - Public Comment

Chief Anderson and Office Chief Stockton:

ClimatePlan is a statewide network organization that focuses on issues that intersect transportation, including land-use planning, climate policy, and air quality. We respectfully submit these comments on the State Highway Operation and Protection Program (SHOPP) 2022 Draft Project list.

First and foremost, we are encouraged by Caltrans' recent update of the complete streets policy. This new policy provides much needed clarity on how to integrate complete streets into all transportation projects funded by SHOPP. We know complete streets are vital to meeting the state's climate and equity goals. Giving communities multimodal options can result in more walkable, safe, and healthier communities. This mode shift away from vehicles will produce reductions in greenhouse gases and potentially spawn investment in economic development¹. While we understand that this policy will take time to implement, we look forward to all projects in future SHOPP lists implementing complete streets elements.

We also commend Caltrans' investment in zero emission charging infrastructure and climate resiliency. Transportation investments have the ability to increase community resilience and provide meaningful investments. These same investments have the ability to displace and reshape communities in ways that cause more harm than good. It is imperative that as SHOPP is investing in these types of projects, the communities are at the forefront of decision making.

Thus, while we appreciate Caltrans' shift to climate resiliency by updating the complete streets policy and investing in zero emission infrastructure, we are disappointed with the process of the 2022-2024 SHOPP Draft Project list. ClimatePlan, many of our partners, and various other communities work diligently with Caltrans throughout the year to build meaningful

¹ https://www.calbike.org/resources/fact_sheets_and_faq_s/complete_streets_fact_sheet/

reciprocal relationships. We were disappointed to see the timing of the SHOPP Draft Project list as well as little to no notice of its posting. Caltrans will not be able to receive meaningful engagement since part of the time allotted for public comment coincides with time that people take off for the holidays. This greatly stifles engagement and seeds mistrust.

We know that one of Caltrans' values is engagement, and the department is committed to doing this through effective communication, collaboration, teamwork, and partnership.² We look forward to better communication and partnership in the future. Thank you for allowing us to comment on the 2022- 2024 Draft SHOPP project list.

Sincerely,

Nailah Pope-Harden, Executive Director
ClimatePlan

Carter Rubin, Interim Director of Transportation
Natural Resources Defense Council

Caro Jauregui, Co-Executive Director
California Walks

David Diaz, MPH, Executive Director
ActiveSGV

² <https://dot.ca.gov/about-caltrans>

Caltrans Response to ClimatePlan, NRDC, CA Walks, & ActiveSGV:

Thank you for commenting on the Proposed 2022 State Highway Operation and Protection Program (SHOPP) project list. The Department of Transportation (Caltrans) appreciates your support of Caltrans' investment in zero emission charging infrastructure and climate resiliency. Caltrans further acknowledges your disappointment in the unfortunate notice and timing for the review of the 2022 SHOPP Project List. In addition to the Regional Transportation Planning Agencies' (RTPA's) review and comment period, the California Transportation Commission (Commission) will conduct a public hearing process before adopting the 2022 SHOPP document. ClimatePlan will have the opportunity to provide further comments as a result of the Commission process.

Mr. Lyle Stockton
Office Chief, State Highway Operation and Protection Program
California Department of Transportation
1120 N Street
Sacramento, CA 95814

Subject: Comments on the Draft 2022 State Highway Operations and Protection Program (SHOPP) Project List

Dear Mr. Stockton:

Thank you for the opportunity to comment on the California Department of Transportation's (Caltrans') Draft 2022 SHOPP Project List. RCTC commends Caltrans' concerted effort and attention in the Draft 2022 SHOPP Project List to achieve asset condition performance targets from the State Highway System Management Plan and as intended by Senate Bill 1 (Statutes of 2017).

RCTC is pleased to see nearly \$900 million in the Draft 2022 SHOPP Project List is proposed on projects in Riverside County. This investment builds on the previous SHOPP investments in projects currently under construction in Riverside County, particularly the pavement rehabilitation project on Interstate 15.

RCTC is especially supportive of Caltrans' proposed programming for EA 1F561 to contribute funding to the Coachella Valley Multiple Species Habitat Conservation Plan (MSHCP). As managing agency for the Riverside Conservation Authority and as the single-largest financial contributor to the Western Riverside County MSHCP, RCTC is acutely aware of the tremendous environmental and project delivery benefits both MSHCPs have delivered and continue to promise.

We believe there are opportunities to enhance operations of the freeway system within Riverside County by adding auxiliary lanes, making modifications to on-ramps to provide increased vehicle storage and longer merge distances, and other operational improvements to key locations. This will enhance the effectiveness of the many millions of dollars programmed and already spent on Transportation Management Systems elements.

Specifically, RCTC recommends that auxiliary lane improvements on Interstate 15 recommended in the Caltrans District 8 Corridor Operational Investment Analysis Planning for Operations FY 19/20 document completed in March 2020 be considered for inclusion in the SHOPP.

Mr. Lyle Stockton
January 12, 2022
Page 2

Additionally, RCTC submits the following recommendations for current or future consideration of SHOPP funding to improve the state highway system condition in western Riverside County:

State Route 60

- San Bernardino County line to Interstate 215/State Route 91 - profile grinding
- State Route 91 to Canyon Crest - profile grinding and up to 35percent slab replacement in both directions
- Canyon Crest to Martin Luther King Boulevard - pavement rehabilitation or replace with Portland Cement Concrete Pavement
- Implement the auxiliary lanes recommended in the Caltrans District 8 Corridor Operational Investment Analysis Planning for Operations FY 19/20 document completed in March 2020

State Route 91

- I-15 to I-215 - profile grinding and random slab replacement in both directions with replacement/rehabilitation of bridge approach slabs, AC ramps, shoulder, and dike replacement
 - Currently only Tyler to Madison is programmed; \$20 million does not seem adequate

Interstate 15

- Post Mile 22-32 - replace median shoulders
- Southbound Limonite to Norco Drive - profile grind recent slab replacement
- Implement the auxiliary lanes recommended in the Caltrans District 8 Corridor Operational Investment Analysis Planning for Operations FY 19/20 document completed in March 2020.

Interstate 215

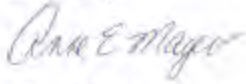

- RCTC is pleased to see pavement rehabilitation projects proposed from Martin Luther King Boulevard to San Jacinto River Bridge. We hope that project includes shoulder rehabilitation.

Finally, RCTC encourages more regular communication from the Districts in the SHOPP planning process. While significant investment is always appreciated, coordination of project schedules and minimizing conflicts with existing locally funded projects is essential. We encourage the Department to incorporate time within the SHOPP development process for Districts to collaborate with their partners. RCTC hereby requests coordination be initiated by Caltrans at the onset of, and continuing through, the planning and development of the 2024 SHOPP Project List.

Mr. Lyle Stockton

Thank you for your consideration of our comments. Please contact me at (951) 787-7141 or AMayer@rctc.org if you have any questions or if you would like to discuss our comments.

Sincerely,

Anne Mayer,
Executive Director

c: Jon Pray, California Transportation Commission
Michael Beauchamp, Caltrans District 8

Caltrans Response to Riverside County Transportation Commission:

Thank you for commenting on the Proposed 2022 State Highway Operation and Protection Program (SHOPP) project list. The list of 2022 SHOPP projects represent two years out of the 10-year plan outlined in the 2019 State Highway System Management Plan (SHSMP). SHSMP presents a performance driven and integrated management plan for California's State Highway System (SHS) needs, investments, and resulting performance projections for the 10-year period spanning July 2019 – June 2029.

California Department of Transportation (Caltrans) appreciates your acknowledgment of the proposed EA 1F561 which is intended to support the Coachella Valley Multiple Species Habitat Conservation Plan (MSHCP). The project also demonstrates Caltrans commitment to Environmental Stewardship.

As part of the State's efforts to enhance operations in the system, Corridor Operational Investment Analysis Planning for Operations (P4Ops) FY 19/20 was developed in partnership with the Regional Transportation Planning Agencies. In the plan multiple Transportation System Management & Operational related Projects (TSMO) strategies were outlined.

The report identified six corridors in District 8 as follows:

1. San Bernardino State Route 60 (SBD SR-60) - \$188.75 Mil in needs
2. San Bernardino State Route 210 (SR-210) - \$137.1 Mil in needs
3. San Bernardino State Route 83 (SR-83) - \$11.77 Mil in needs
4. Riverside State Route 60 (RIV SR-60) - \$150.03 Mil in needs
5. Riverside Interstate 15 (I-15) - \$174.94 Mil in needs
6. Riverside State Route 74 (SR-74) \$6.21 Mil in needs

That is a total of \$668.8 Mil of mobility needs. Prior SHSMPs did not reflect this information as they pre-dated this report. We anticipate the inclusion of mobility needs in the 2023 SHSMP which will provide other means to an incremental implementation. The state welcomes partnering opportunities to accelerate addressing those needs which will include analyzing innovative strategies to be in alignment with the Department's goals.

The elements identified in the P4Ops report are SHOPP eligible. However, the funding need exceeds the programming capacity in the 2019 SHSMP for mobility improvements. Note that, the need for all assets statewide outlined in the published 2019 SHSMP was \$83.286B compared to funding of \$47.118B.

Nonetheless, District 08 will continue to strive and seek funding opportunities in the future SHOPP cycles as well as other eligible emerging programs to implement strategic improvements along the corridors.

In reference to RCTC's recommendation outlined in the letter, the following are what's planned and where we see opportunities:

State Route 60

- San Bernardino County line to Interstate 215/State Route 91 - profile grinding.

District 08 will investigate the profile concerns and seek funding opportunities through the Highway maintenance program and/or the future SHOPP cycles as specific deficiencies are identified.

- State Route 91 to Canyon Crest - profile grinding and up to 35percent slab replacement in both directions

Under District 08 project EA 1J610 (Riv-215-PM 40.5/42.7, 2020 SHOPP, RTL 2023/24) the district is planning a minor pavement rehabilitation project that includes this segment. The project scope includes mainline slab replacement (PM 41.0/42.7), cold-plane and overlay for mainline (PM 40.5/41.0), cold plane, overlay of the on and off-ramps.

- Canyon Crest to Martin Luther King Boulevard – pavement rehabilitation or replace with Portland Cement Concrete Pavement

Under District 08 project EA 1L170 (Riv-215-PM R31.2/40.5, 2022 SHOPP, RTL 2024/25), the district is planning a minor pavement rehabilitation project adjacent to EA 1J610 and includes this segment. The project scope includes pavement work to cold plane and overlay with RHMA-G and/or HMA-A on the mainline, shoulders, add maintenance vehicle pullouts, on-ramps, off-ramps, connectors, and gore areas.

- Implement the auxiliary lanes recommended in the Caltrans District 8 Corridor Operational Investment Analysis Planning for Operations FY 19/20 document completed in March 2020

District 08 will continue to strive and seek funding opportunities in the future SHOPP cycles as well as other eligible emerging programs to implement strategic improvements along the identified corridors to include analyzing innovative strategies to be in alignment with the Department's goals.

State Route 91

- I-15 to I-215 -profile grinding and random slab replacement in both directions with replacement/rehabilitation of bridge approach slabs, AC ramps, shoulder, and dike replacement.

- o Currently only Tyler to Madison is programmed; \$20 million does not seem adequate

District 08 is working on three projects within this segment as follows:

1. SHOPP ID 21127 (Riv-091-PM R0.0/10.0, 2028 SHOPP, RTL 2031/31) which is a minor pavement rehabilitation project. Pavement work includes slab replacement, grinding all lanes, and full lane replacement at westbound lane #5 between PM 2.8/3.7 & PM 4.7/5.7. Cold Plane and overlay shoulders, ramps, and connectors.

2. Project EA 1L130 (Riv-091-PM 10.0/13.5, 2024 SHOPP, RTL 2026/27) which is a minor pavement rehabilitation project within this segment. Pavement work includes slab replacement, grinding at slab replacement location, cold plane, overlay ramps and shoulders.

3. Project EA 1L180 (Riv-091-PM 13.5/16.8, 2022 SHOPP, RTL 2024/25) which is a minor pavement rehabilitation project. Pavement work includes replacing random slabs for mainline lanes, cold plane and overlay existing mainline shoulders, on and off ramps. Replacing asphalt concrete dike and constructing concrete termini at the off-ramps.

The above projects did not initially include bridge approach slabs; however, it is planned to be included in the scope.

Interstate 15

- Post Mile 22-32 - replace median shoulders

Under District 08 project EA 1F142 (Riv-015-PM 23.9/33.4, 2018 SHOPP, RTL 2018/19) the district has developed a minor pavement rehabilitation project. The project pavement scope includes removing/ replacing JPCP slabs and perform surface grinding to improve ride quality. Cold plane and overlay ramps and shoulders. We see an opportunity for the segment between PM 22 and 23.9 in future SHOPP projects.

- Southbound Limonite to Norco Drive - profile grind recent slab replacement

Under District 08 project EA 1F143 (Riv-015-PM 38.2/51.5, 2018 SHOPP, RTL 2019/20) the district has developed a minor pavement rehabilitation project. The project pavement scope includes removing and replacing individual failing slabs and PCC grinding on the mainline.

- Implement the auxiliary lanes recommended in the Caltrans District 8 Corridor Operational Investment Analysis Planning for Operations FY 19/20 document completed in March 2020.

District 08 will continue to strive and seek funding opportunities in the future SHOPP cycles as well as other eligible emerging programs to implement strategic improvements along the identified corridors to include analyzing innovative strategies to be in alignment with the Departments' goals.

Interstate 215

- RCTC is pleased to see pavement rehabilitation projects proposed from Martin Luther King Boulevard to San Jacinto River Bridge. We hope that project includes shoulder rehabilitation.

The District is working on two projects within this segment as follows:

1. Under project EA 1J290 (Riv-215-PM 25.0/R31.2, 2020 SHOPP, RTL 2023/24) the district has developed a minor pavement rehabilitation project. The project pavement scope includes cold plane and overlay existing mainline pavement with RHMA-G. Cold plane and overlay existing inside and outside mainline shoulders. Cold plane and overlay ramps.
2. Under project EA 1L170 (Riv-215-PM R31.2/40.5, 2022 SHOPP, RTL 2024/25) the district has developed a minor pavement rehabilitation project adjacent to EA 1J610 which includes this segment. The project pavement scope includes cold plane and overlay with RHMA-G and/or HMA-A on the mainline, mainline shoulders, maintenance vehicle pullouts, on-ramps, off-ramps, connectors, and gore areas.

Caltrans appreciates Riverside County Transportation Commissions' partnership and values the continuing investment made in improving the regional transportation system in Riverside county. District 08 will continue to improve the communication and coordination for the development of the SHOPP in Riverside County. Thank you for the valuable comments and the strong partnership throughout the years.

2022 State Highway Operation and Protection Program Public Comments

Comment submitted by:

Joseph Stramaglia, Project Delivery
Kern Council of Governments (KCOG)

January 10, 2022

James R. Anderson, Chief
Division of Financial Programming
Department of Transportation
Mail Station 82 P.O. Box 942874
Sacramento, CA 94274-0001

RE: Comments on the Draft 2022 SHOPP Version 3.0

Dear Mr. Anderson:

Thank you for the opportunity to comment on Draft 2022 State Highway Operation and Protection Program. We have reviewed your document and have the following comments about several of our key highway corridors including SR 14, 58, 99, 204 and U.S. 395.

1. There needs to be a comprehensive safety project on State Route 204 to address numerous operational and safety challenges.
2. We would like to see the integration of truck-climbing/passing safety lanes on SR 58 integrated with proposed pavement maintenance work in future SHOPP cycles.
3. We would like to see follow-through for SHOPP projects studied in years past and not brought forward. There are Project Study Reports for the SR 58 truck-climbing lanes and auxiliary lane at 58/99 from 2005 that are being done again today, with very high-cost estimate ranges.
4. Two-lane rural highways need incremental improvements (wider shoulders, better lighting, etc.) not just maintenance. Note that a disproportionately high number of fatalities happen on rural routes.
5. Several other project specific comments are also provided on the following attachment.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Ahron Hakimi'.

Ahron Hakimi, Executive Director

CC: Diana Gomez, Caltrans District 6 Director
Ryan Dermody, Caltrans District 9 Director

ATTACHMENT: KERN COG PROJECT-SPECIFIC COMMENTS ON DRAFT 2022 SHOPP

Project Specific KCOG Comments on Draft 2022 SHOPP				
Dist-Co-Rte	PPNO	Total Cost	Program	KCOG Comment
09-Kern-14	2672	\$8,707,000	SHOPP	Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.
06-Kern-33	6978	\$22,570,000	SHOPP	Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic. Re-align obelie intersections or add roundabout(s) to improve vehicle safety.
06-Kern-46	3425	\$19,955,000	SHOPP	Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.
06-Kern-46	8005	\$17,502,000	SHOPP	Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.
09-Kern-58	2668	\$165,515,000	SHOPP	Should include truck safety improvements including roadway re-alignment, westbound downhill passing lanes, and eastbound truck climbing lanes planned for over 20 years.
06-Kern-99	6958	\$68,290,000	SHOPP	Should include replacement of Palm Ave Bridge and Auxiliary lanes.
06-Kern-119	6805	\$59,000,000	SHOPP	Should replace bridge over SR99 to accommodate bicycle and pedestrian traffic.
06-Kern-166	6896	\$14,540,000	SHOPP	Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.
06-Kern-184	6803	\$33,055,000	SHOPP	Should include safety elements considering the recent triple fatal accident within the project limits.
06-Kern-223	3019	\$12,752,000	SHOPP	Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

2022 State Highway Operation and Protection Program KCOG Public Comments (summarized)

1. There needs to be comprehensive safety project on State Route 204 to address numerous operational and safety challenges.
2. We would like to see the integration of truck-climbing/passing safety lanes on SR 58 integrated with proposed pavement maintenance work in future SHOPP cycles.
3. We would like to see follow-through for SHOPP projects studied in years past and not brought forward. There are Project Study Reports for the SR 58 truck-

climbing lanes and auxiliary lane at 58/99 from 2005 that are being done again today, with very high-cost estimate ranges.

4. Two-lane rural highways need incremental improvements (wider shoulders, better lighting, etc.) not just maintenance. Note that a disproportionately high number of fatalities happen on rural routes.

Several other project specific comments are also provided on the attachment:

5. 09-Kern-14: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

6. 06-Kern-33: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic. Re-align obelie intersections or add roundabout(s) to improve vehicle safety.

7. 06-Kern-46: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

8. 06-Kern-46: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

9. 09-Kern-58: Should include truck safety improvements including roadway re-alignment, westbound downhill passing lanes, and eastbound truck climbing lanes planned for over 20 years.

10. 06-Kern-99: Should include replacement of Palm Ave Bridge and Auxiliary lanes.

11. 06-Kern-119: Should replace bridge over SR 99 to accommodate bicycle and pedestrian traffic

12. 06-Kern-166: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

13. 06-Kern-184: Should include safety elements considering the recent triple fatal accident within the project limits.

14. 06-Kern-223: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

Caltrans Response to Kern Council of Governments:

Thank you for commenting on the Proposed 2022 State Highway Operation and Protection Program (SHOPP) project list. Due to the specific project related issues we encourage you to continue to work with regional Caltrans Districts 6 and 9 on a regular basis to identify opportunities early in the process. Caltrans responses to comments are shown below. The numbering of responses corresponds with the summarized numbered comment:

1. There needs to be comprehensive safety project on State Route 204 to address numerous operational and safety challenges. Response: Caltrans investigates sections of highway with high incidents to determine if safety projects are warranted. Currently, portions of Route 204 have programmed projects to provide safety improvements. The Department will continue to assess needs along the Route and program competitive projects where possible utilizing the limited funding opportunities.

2. We would like to see the integration of truck-climbing/passing safety lanes on SR 58 integrated with proposed pavement maintenance work in future SHOPP cycles. Response: Integrating the truck climbing lanes into the current programmed pavement rehabilitation project would be ideal, however there is currently limited funding opportunities available to do so. Caltrans will continue to work with Kern COG and others in exploring funding opportunities for the truck climbing lane project beyond the current phase.

3. We would like to see follow-through for SHOPP projects studied in years past and not brought forward. There are Project Study Reports for the SR 58 truck-climbing lanes and auxiliary lane at 58/99 from 2005 that are being done again today, with very high-cost estimate ranges. Response: District 9 recently received funding for the PAED phase for Location 2 of the proposed truck climbing lanes. No funding beyond the PAED phase has been identified. The proposed auxiliary lane projects on SR 99/58 require complex environmental and preliminary engineering work. Caltrans continues to welcome feedback, suggestions, and collaboration in obtaining funding for the SR 58 Truck Climbing Lanes and the SR99/58 auxiliary lane projects.

4. Two-lane rural highways need incremental improvements (wider shoulders, better lighting, etc.) not just maintenance. Note that a disproportionately high number of fatalities happen on rural routes. Response: Caltrans continues to look for improvement opportunities where feasible. We welcome feedback, suggestions, and continued collaboration during our quarterly coordination meetings with Kern COG / Kern County.

5. 09-Kern-14: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

Response: This project includes safety improvements such as skipped rumble strips on the fog line (minimizes impact to bicycles), and centerline rumble strips. In addition, a Project Initiation Report (PIR) is under development for this area that seeks funding to make incremental safety improvements, which may include widening shoulders, shoulder and centerline rumble strips, bridge widening, and bridge scour mitigation. Widening of shoulders and bridges will improve pedestrian and bicycle accessibility.

6. 06-Kern-33: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic. Re-align obelisc intersections or add roundabout(s) to improve vehicle safety.

Response: The intent of this project is to provide an asphalt overlay to extend the pavement service life and improve ride quality. The overlay will be designed for the full roadway width from edge of existing pavement to opposing edge of existing pavement. Caltrans performed an accident analysis for the project limits with findings of no concentration of accidents. In partnership and at the request of Kern COG, a cost estimate is being prepared to add shoulder widening scope to the project. Funding opportunities are currently being sought in partnership with Kern COG.

7. 06-Kern-46: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

Response: The intent of this project is to provide an asphalt overlay to extend the pavement service life and improve ride quality. The overlay will be designed for the full roadway width from edge of existing pavement to opposing edge of existing pavement. Please continue to work with District 9 to identify opportunities.

8. 06-Kern-46: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic.

Response: The intent of this project is to provide an asphalt overlay to extend the pavement service life and improve ride quality. The overlay will be designed for the full roadway width from edge of existing pavement to opposing edge of existing pavement. Please continue to work with District 9 to identify opportunities.

9. 09-Kern-58: Should include truck safety improvements including roadway re-alignment, westbound downhill passing lanes, and eastbound truck climbing lanes planned for over 20 years.

Response: This project will make curve radii standard and includes other safety improvements, including rumble strips, median barrier replacement, and bridge rail upgrades. The westbound downhill passing lanes are beyond the scope of this SHOPP project. The truck climbing

lanes project is currently in development and Caltrans will continue to work with Kern COG and others in exploring funding opportunities for the project.

10. 06-Kern-99: Should include replacement of Palm Ave Bridge and Auxiliary lanes. Response: This project is a Resurface, Restoring, and Rehabilitation (RRR) project that proposes to rehabilitate the No. 4 lane with CRCP and repair failed panels in all other lanes. Kern COG has discussed contributing STIP / RIP funds to this project to fund an auxiliary lane in the southbound direction and the replacement of the Palm Ave Overcrossing structure. Caltrans welcomes partnership funding commitments that will fund this additional scope.

11. 06-Kern-119: Should replace bridge over SR 99 to accommodate bicycle and pedestrian traffic. Response: This is a roadway rehab project that is currently in advance design phase with a target delivery in the 2023/24 FY. The project limits are west of the Route 99 Bridge and do not include work on the bridge.

12. 06-Kern-166: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic. Response: The intent of this project is to provide an asphalt overlay to extend the pavement service life and improve ride quality. The overlay will be designed for the full roadway width from edge of existing pavement to opposing edge of existing pavement. Please continue to work with District 6 to identify opportunities.

13. 06-Kern-184: Should include safety elements considering the recent triple fatal accident within the project limits. Response: Many safety improvements are proposed in the current project. The project proposes to construct standard 8-foot shoulders and Class II bike lanes throughout the limits: construct curb, gutter, and sidewalk at various locations; place guardrail at the Eastside Canal to shield the headwall and “drop off” that is 17 to 18 feet from the edge of travel way (in both directions); construct a pedestrian crossing at the Union Pacific Railroad at Edison Highway; upgrade traffic signals; construct median “worm curb” at various locations to channelize and reduce left-turning movements; install rumble strips at various locations; and construct a Hybrid Beacon and Crosswalk in the community of Lamont.

14. 06-Kern-223: Should include the addition of paved shoulders and/or bicycle lanes plus safety elements to accommodate bicycle and pedestrian traffic. Response: This is a pavement focused (2R) and resurfacing, restoration project that rehabilitates the existing 8-foot shoulders. The safety screening criteria were met for pedestrian and bicycle needs in areas where shoulders are less than 8-feet. The 8-foot shoulders are bicycle and pedestrian accessible.

CALIFORNIA TRANSPORTATION COMMISSION

STATE HIGHWAY OPERATION AND PROTECTION PROGRAM GUIDELINES

I. INTRODUCTION

1. Purpose

These guidelines describe the policy, standards, criteria and procedures for the California Transportation Commission's (Commission) development, adoption, and management of the State Highway Operation and Protection Program (SHOPP).

2. Commission Mission

The Commission is an independent public agency dedicated to ensuring a safe, financially sustainable, world-class multimodal transportation system that reduces congestion, improves the environment, and facilitates economic development through the efficient movement of people and goods.

3. Guidelines Objectives

These guidelines were developed and adopted with the following basic objectives:

- a. Develop the SHOPP as a resource management document that is consistent with the Transportation Asset Management Plan (TAMP) and the State Highway System Management Plan.
- b. Accelerate project delivery, to ensure efficient use of funds, and to address deferred maintenance on the state highway system.
- c. Establish allocation thresholds that the Commission determines are necessary to ensure efficiency and provide exceptions as needed so that projects are not unnecessarily delayed.
- d. Recognize that accountability, flexibility, and simplicity are key components to the objectives of the Guidelines.

4. Statutory Authority

See Appendix B for a listing of the Statutory Authority related to the SHOPP Guidelines.

5. Applicability of SHOPP Guidelines

The SHOPP Guidelines apply to projects programmed in the SHOPP. The SHOPP Guidelines do not apply to transportation programming requirements specified in Federal Transportation Improvement Programs (FTIP) and the Federal Statewide Transportation Improvement Program (FSTIP) required

by federal statutes. Generally, all projects receiving federal transportation funds must be programmed in a FTIP (for projects in urbanized regions) and in a FSTIP. Metropolitan Planning Organizations are responsible for developing and adopting FTIPs and the California Department of Transportation (Caltrans) is responsible for preparing the FSTIP. The requirements for FTIPs and the FSTIP are specified in federal statutes (Title 23 United States Code) and federal regulations (23 Code of Federal Regulations part 450).

6. Compliance with Federal and State Requirements

Caltrans shall comply with all federal and state requirements.

7. Amendments to the Guidelines

The Commission may amend the adopted SHOPP guidelines after first giving notice of the proposed amendment and conducting at least one public hearing.

8. Delegation of Authority

As of the date of these SHOPP Guidelines, the Commission has taken formal action to delegate certain authorities to Caltrans. The following resolutions are included in the appendices:

- Resolution G-00-13: Project Development Costs
- Resolution G-19-01: Sub-allocation and Adjustment of Right of Way Capital
- Resolution G-19-05: Sub-allocation and Adjustment of the SHOPP Minor Program.
- Resolution G-06-13: Allocation of Funds for Safety Projects.
- Resolution G-11-16: Funding Emergency Condition Response Projects.
- Resolution G-19-12: Adjustment and Modification of Project Allocations and Descriptions.

II. SHOPP DOCUMENT OVERVIEW AND DEVELOPMENT

9. General

The SHOPP is a biennial program adopted no later than April 1 of each even-numbered year. Consistent with the Biennial State Transportation Improvement Program (STIP) Fund Estimate, each SHOPP will cover the last two years of the previous SHOPP and add two new years of programming capacity.

10. SHOPP Preparation

Pursuant to Government Code Section 14526.5(a), and consistent with the TAMP, Caltrans shall prepare a four-year SHOPP for the expenditure of transportation funds for major capital improvements needed to preserve and protect the state highway system. Consistent with the TAMP and the State Highway System Management Plan, each new SHOPP document shall include projects carried forward from the previous SHOPP, new projects, and reservations. The total amount programmed in each fiscal year of the SHOPP shall not exceed the amount specified in the STIP Fund Estimate.

It is the Commission's expectation that the Department will perform outreach and gather input from local partners in the development of the SHOPP. This should include, but not be limited to, stakeholder input on: the State Highway System Management Plan, the SHOPP Ten-Year Project Book, and the selection of new projects to be included in the four-year SHOPP Program.

Pursuant to Streets and Highways Code Section 2030 (2), to the extent possible and cost-effective, and where feasible, Caltrans shall:

- a. Use advanced technologies and material recycling techniques that reduce the cost of maintaining and rehabilitating the streets and highways, and that exhibit reduced levels of greenhouse gas emissions through material choice and construction method.
- b. Use advanced technologies and communications systems in transportation infrastructure that recognize and accommodate advanced automotive technologies that may include, but are not necessarily limited to, charging or fueling opportunities for zero-emission vehicles, and provision of infrastructure-to-vehicle communications for transitional or full autonomous vehicle systems.
- c. In the context of both the project scope and the risk level for the asset due to global climate change, include features in projects to better adapt the asset to withstand the negative effects of climate change and make the asset more resilient to impacts such as fires, floods, and sea level rise.
- d. In the context of facility type, right of way, project scope, and quality of nearby alternative facilities, incorporate complete street elements, including, but not limited to, elements that improve the quality of bicycle and pedestrian facilities and that improve safety for all users of transportation facilities.

Each new SHOPP document shall include a summary for each item listed above and how the proposed submittal of projects meets the above expectations.

11. SHOPP Development Schedule

The following schedule lists the major milestones for the development and adoption of the SHOPP:

Milestone	Deadline
Caltrans submits the proposed State Highway System Management Plan to the Commission for review and comments	By February 15 of odd-numbered years.
Commission reviews and comments on the State Highway System Management Plan	March of odd-numbered years
Caltrans submits final State Highway System Management Plan to Governor and Legislature	By June 1 of odd-numbered years
Caltrans presents Draft Fund Estimate to the Commission	By July 15 of odd-numbered years
Commission adopts Fund Estimate	By August 15 of odd-numbered years
Caltrans and Regional Transportation Planning Agencies coordinate in the development of candidate projects	Ongoing
Caltrans to share initial draft of proposed SHOPP with Regional Transportation Planning Agencies	By December 7 of odd-numbered years
Caltrans submits proposed SHOPP	By January 31 of even-numbered years
SHOPP Hearing in Northern California	February of even-numbered years
SHOPP Hearing in Southern California	March of even-numbered years
Commission Adopts SHOPP and Submits to Legislature and Governor	By April 1 of even-numbered years

12. Eligibility

Projects eligible for SHOPP funds include major capital improvements that are necessary to preserve and protect the state highway system and are consistent with the TAMP. Projects included in the program shall be limited to improvements relative to the maintenance, safety, operation, and rehabilitation of state highways and bridges that do not add a new traffic lane to the system.

Examples of SHOPP-eligible operation improvement projects include, but are not limited to the following:

- a. Auxiliary lanes near ramps and interchanges to allow for safe acceleration and deceleration of entering and exiting vehicles.
- b. Intersection modifications including traffic signals.

- c. Slow vehicle lanes on conventional highways and four lane freeways, where justified on the basis of an engineering analysis.
- d. Curve and vertical alignment corrections.
- e. Two-way left turn lanes.
- f. Channelization.
- g. Turnouts.
- h. Chain control and truck brake inspection sites.
- i. Shoulder widening.
- j. Traffic Management Systems.
- k. Traffic Management Centers.
- l. Multimodal corridor projects.

13. Display of Project Scope, Budget, Schedule, and Project Outputs

The SHOPP document shall include the following information for each project:

- a. The project title, including a brief description of the project location and limits (community name, corridor, street name, etc.), and a phrase describing the type and scope of the project.
- b. A unique project identification number provided by Caltrans.
- c. For projects on the state highway system, the route number and post-mile limits.
- d. Any appropriate funding restriction or designation, including projects requiring state-only funding, or projects requiring federal funds.
- e. Planned project outputs for each project. The project outputs should be based on quantified and qualitative information to document transparently and in plain language how the project is consistent with the Commission-approved TAMP.
- f. A notation indicating that the project has met the threshold and will be required to submit a Senate Bill (SB) 1 SHOPP Baseline Agreement.

14. Project Budget

For each project in the SHOPP, Caltrans shall identify each phase of a project and include the specified budget, including the source and amounts of non-SHOPP funds, if any, committed to the project phase and overall project. Pursuant to Government Code Section 14526.5(c)(1), Caltrans, at a minimum, shall specify, for each project in the SHOPP (where applicable), the budget for each of the following project phases:

- a. Project Approval and Environmental Document (PA&ED phase) (only consists of support)

- b. Plans, Specifications, and Estimate (PS&E phase) (only consists of support)
- c. Right of way (support and capital)
- d. Construction (support and capital)

15. Project Milestone Dates

Each phase of a project must have a specified schedule. Pursuant to Government Code Section 14526.5(c)(2), Caltrans shall specify a projected delivery date for each of the following components:

- PA&ED phase completion
- PS&E phase completion (signified as Ready to List (RTL))
- Right of way certification
- Start of Construction

16. Database

Caltrans is responsible for maintaining an electronic database record of the adopted SHOPP documents and Commission actions that amend the SHOPP. The current database is known as the California Transportation Improvement Program System (CTIPS).

Consistent with this database, Caltrans shall develop and maintain a transparent system to display in plain language each SHOPP project's support and capital budget, schedule, scope, expected project outputs and updates thereof to enhance communication among the districts and headquarters, to ensure efficient management of the entire portfolio, and to provide public transparency.

III. RELATED STATUTORY DOCUMENTS

17. Transportation Asset Management Plan

Pursuant to Government Code Section 14526.4, Caltrans in consultation with the Commission shall prepare a robust Transportation Asset Management Plan to guide selection of projects for the SHOPP. The Commission reviews and approves the Transportation Asset Management Plan and adopts targets and performance measures reflecting state transportation goals and objectives. The Transportation Asset Management Plan is a strategic and systematic process of operating, maintaining, and upgrading physical assets effectively through their lifecycle by focusing on business and engineering practices for resource allocation and utilization based on well-defined objectives. Pursuant to Government Code Section 14526.7(a), Caltrans shall incorporate the performance targets adopted by the Commission pursuant to Government Code Sections 14526.4 and 14526.5. On March 26, 2015, the Commission approved four asset classes

for the first phase of the Transportation Asset Management Plan that included: pavement, bridge, culverts, and transportation management system elements.

Notwithstanding the foregoing, SB 1 (Beall, Chapter 5, Statutes of 2017) states the Legislature's intent that Caltrans meet the following preliminary performance outcomes for additional state highway investments by the end of 2027, in accordance with applicable state and federal standards:

- Not less than 98 percent of pavement on the state highway system in good or fair condition.
- Not less than 90 percent level of service achieved for maintenance of potholes, spalls, and cracks.
- Not less than 90 percent of culverts in good or fair condition.
- Not less than 90 percent of the transportation management system units in good condition.
- Fix not less than an additional 500 bridges.

On March 21, 2018, the Commission approved the Transportation Asset Management Plan, the annual performance benchmarks for the four primary asset classes (bridges, pavements, drainage systems, and transportation management system elements), and the annual performance targets for all supplementary asset classes.

18. State Highway System Management Plan

Pursuant to Streets and Highways Code Section 164.6(a)(1), Caltrans shall prepare a State Highway System Management Plan. The State Highway System Management Plan shall include a ten-year state highway system rehabilitation plan for the rehabilitation or reconstruction, or combination thereof, by the SHOPP, of all state highways and bridges owned by the state.

Pursuant to Streets and Highways Code Section 164.6(a)(2), the State Highway System Management Plan shall also include a five-year maintenance plan that addresses the maintenance needs of the state highway system. The maintenance plan shall be updated every two years. The maintenance plan shall include only maintenance activities that, if the activities are not performed, could result in increased SHOPP costs in the future. The maintenance plan shall identify any existing backlog in those maintenance activities and shall recommend a strategy, specific activities, and an associated funding level to reduce or prevent any backlog during the plan's five-year period.

IV. FUNDING

19. Biennial STIP Fund Estimate

By July 15 of each odd-numbered year, Caltrans shall submit to the Commission a proposed fund estimate for the following five-year STIP period which also includes proposed program funding levels for the SHOPP. The Commission shall adopt the STIP Fund Estimate by August 15 of that same year. The assumptions on which the STIP Fund Estimate is based shall be determined by the Commission in consultation with Caltrans, regional agencies, and county transportation commissions.

20. State-Only Funding

Projects must follow the Federal-Aid Project Funding Guidelines as adopted by the Commission. The Commission will assume that all projects will be qualified for federal transportation funding unless specifically exempt per the Federal-Aid Project Funding Guidelines. Whenever Caltrans deviates from the Federal-Aid Project Funding Guidelines and designates a project to be programmed for state-only (non-Federal) funding, it will explain the reason for this designation. Unless consistent with the Federal-Aid Project Funding Guidelines, projects programmed without a state-only designation and later proposed for state-only funding allocations will be subject to Commission approval at allocation.

21. Joint State and Local Funding

If Caltrans and a local or regional agency agree, they may, if consistent with all applicable laws and regulations, recommend that a new project or a project cost increase be jointly funded from state and local funds and execute a cooperative agreement to reflect the agreed participations.

22. Grant Anticipation Revenue Vehicle (GARVEE) Bonding

If the fund estimate forecasts the availability of federal funding for the SHOPP, the Commission may, by SHOPP amendment, select SHOPP eligible projects proposed for accelerated construction through Grant Anticipation Revenue Vehicle (GARVEE) bonding. The Commission will select projects for GARVEE bonding that rehabilitate and/or improve operation of corridors and gateways for interregional travel and goods movement, especially projects that promote economic development and projects that are too large to be programmed within the SHOPP on a pay-as-you-go basis. The Commission's expectation is that, generally, these will be projects with very high costs.

Each bond will be structured for debt service payments over a term of not more than 12 years. In designating SHOPP projects for bonding and scheduling bond sales, the Commission will give consideration to an overall annual debt service limit of 15 percent of Federal revenues available to the SHOPP.

GARVEE bonds cover only the federally-funded portion of a project's cost (generally 88.5 percent). GARVEE bonding in California is structured so that the state's future federal transportation apportionments pay all debt service. This requires that the entire non-federal portion of project cost (including costs of issuance and interest) be provided at the time of construction on a pay-as-you-go basis. The Commission's policy is that the non-federal portion of project costs will be programmed within the current SHOPP capacity. Although local funds may be applied to the non-federal share, the ability of a local agency to contribute its funding to a SHOPP project will not be a major criterion in the selection of SHOPP projects for GARVEE bonding.

V. ADOPTION/PROGRAMMING

23. SHOPP Submittal

Pursuant to Government Code Section 14526.5(d), Caltrans shall submit the proposed SHOPP to the Commission no later than January 31 of each even year. Caltrans shall provide the Commission with detailed information for all projects including, but not limited to, cost, scope, schedule, and project outputs. The SHOPP document will describe in plain language its overall adequacy and consistency with the State Highway System Management Plan as well as the Commission approved Transportation Asset Management Plan, funding priorities established in Streets and Highways Code Section 167, the level of annual funding needed to implement the program, and the impact of those expenditures on the State Transportation Improvement Program. Prior to submitting its proposed program, Caltrans shall make a draft of the proposed SHOPP available to transportation planning agencies for review and comment and shall include the comments in its submittal to the Commission.

24. Adoption

Pursuant to Government Code Section 14526.5(e), the Commission shall review each SHOPP document relative to its overall adequacy and consistency with the Transportation Asset Management Plan prepared and approved pursuant to Government Code Section 14526.4 and funding priorities established in Streets and Highways Code Section 167, the level of annual funding needed to implement the program, and the impact of those expenditures on the STIP.

Not later than April 1 of each even numbered year the Commission shall adopt the SHOPP document and submit it to the Legislature and to the Governor. The Commission may decline to adopt the SHOPP if the Commission determines that the program is inadequate or it is not sufficiently consistent with the State Highway System Management Plan and Transportation Asset Management Plan.

Pursuant to Government Code Section 14526.5 (f), as part of the Commission's review, the Commission shall hold at least one hearing in

northern California and one hearing in southern California regarding the proposed program.

Each SHOPP document shall be a statement of the Commission's intent for allocation and expenditure of funds for the following four years as well as a resource management document to assist in the planning and utilization of transportation resources in a cost-effective manner. Each adopted SHOPP document shall remain in effect until a new SHOPP is adopted.

Caltrans will publish the SHOPP document within 75 days of the SHOPP adoption and make copies available to the Commission. To facilitate development, analysis and management of the SHOPP, Caltrans will provide the Commission appropriate access to the SHOPP database.

Projects allocated for construction in prior SHOPP documents, but which have not achieved final acceptance, are incorporated by reference in the newly adopted SHOPP document until final acceptance is achieved and a final report of actual expenditures against Commission allocations is provided to the Commission.

25. Project-level Information

To allow for meaningful public engagement early in project development, project-level information will be provided beginning with all projects being worked on in Planning for inclusion in the 2022 SHOPP. At a minimum the information will include: the project description, a vicinity map, the proposed purpose of the project, target construction year, and project contact information. Caltrans shall develop, in consultation with the Commission, a format for portraying the project-level information on a publicly accessible website.

Project information must be updated as project scope and schedule are refined through the project development process.

26. Project Initiation Documents

A new project may only be programmed in the SHOPP with a complete Project Initiation Document that defines and justifies the project scope, cost, schedule, and expected outcomes and benefits including project outputs. A Project Initiation Document is a report that meets the standards of the Commission's *Guidelines for the Preparation of Project Study Reports*. The Project Initiation Document must provide a preliminary estimate of costs for all components. The Project Initiation Document must be submitted, or a link may be provided to view the document electronically. Each Project Initiation Document must account for known risks that might impact the project budget, scope, schedule, and achievement of project outputs from initiation through construction completion. Development of the Project Initiation Documents should include input from local stakeholders as appropriate.

27. Project Selections

Consistent with the Transportation Asset Management Plan and the State Highway System Management Plan, Caltrans shall establish a transparent selection process to select quality eligible projects for each SHOPP document. Each eligible project's planned project outputs must be identified and be consistent with the Transportation Asset Management Plan. Stakeholder input should be considered when selecting projects for the SHOPP document.

28. Programming Project Components Sequentially

Caltrans may not begin project development work on SHOPP projects until the project is programmed in the SHOPP document. Pursuant to Commission Resolution G-00-13, a SHOPP eligible project may be programmed for environmental work only. The Commission recognizes a particular benefit in programming projects for environmental work only, since project costs and particularly project scheduling often cannot be determined with meaningful accuracy until environmental studies have been completed. The premature programming of post-environmental components can needlessly tie up SHOPP programming resources while other transportation needs go unmet.

The Commission will program a project component only if it makes a determination that the component itself is fully funded, either from SHOPP funds or from other committed funds. The Commission will regard non-SHOPP funds as committed when the local agency with discretionary authority over the funds has made its commitment to the project by ordinance or resolution and has entered into a cooperative agreement with Caltrans.

When applicable for federal formula funds, including Surface Transportation Block Grant Program and Congestion Mitigation and Air Quality Improvement Program, the commitment may be by FTIP adoption.

A project that is programmed prior to receiving federal approval for construction must receive the federal approval for construction prior to construction allocation.

29. Programming of Construction Management/General Contractor Projects

Projects using the Construction Management/General Contractor delivery method should be identified at the time of programming. If a Construction Management/General Contractor delivery strategy is determined at a later date, the project shall be amended accordingly. The project will be programmed in the same manner as projects utilizing design-bid-build delivery, although flexibility in schedule, scope and cost may be requested and approved consistent with allocation and programming capacity, and timely use of funds policy.

30. Programming of Long-Lead and Contingency Projects

Commission Resolution G-00-13, approved in June 2000, provides Caltrans with a means to commence project delivery efforts on SHOPP Long Lead projects that require periods longer than the four-year SHOPP time frame to develop. Subject to the approval of the Commission, Long Lead projects shall be programmed in the SHOPP and will be subject to the same delivery, management, and reporting requirements as all other SHOPP projects in the Commission-adopted program.

The Commission further authorized Caltrans to program contingency projects for pre-construction development only, when appropriate, thus creating projects that address performance goals without committing SHOPP resources to construction capital and support prematurely, before the resources are actually needed.

31. Multi-Modal Corridor Projects

SHOPP eligible Multi-Modal Corridor projects may be programmed in the SHOPP when consistent with the Transportation Asset Management Plan and the State Highway System Management Plan. A corridor is defined as a largely linear geographic band defined by existing and forecasted travel patterns involving both people and goods. The corridor serves a particular travel market or markets affected by similar transportation needs and mobility issues. It includes various modes that provide similar or complementary transportation functions, including cross-mode connections.

32. Completion of Environmental Process

The Commission may program funding for project right of way or construction only if it makes a determination that Caltrans will complete the environmental process and can proceed with right of way acquisition or construction within the four-year period of the SHOPP.

Pursuant to Public Resources Code Section 21102, the Commission will not allocate funds to projects for design, right of way or construction until the final environmental document is complete and the Commission has approved the environmentally cleared project for consideration of future funding. For projects that are categorically cleared, a Caltrans determination of categorical exemption is acceptable.

33. Programming Combined SHOPP and Non-SHOPP Projects

Where a project or project component is to be programmed and funded from both SHOPP and non-SHOPP sources, the project description shall indicate whether the non-SHOPP programming commitment is for a particular dollar amount, a particular percentage of total project cost, or a particular element or item of work. All SHOPP projects must be expended proportionally, except as otherwise approved by the Commission. The Commission must approve non-proportional spending for the initial expenditure of SHOPP funds before

other non-SHOPP resources. For projects funded from both SHOPP and non-SHOPP sources and where the Commission has approved non-proportional spending allowing for the expenditure of SHOPP funds before other funds (sometimes referred to as sequential spending), the project is not eligible for an increase (supplemental) allocation under the authority delegated to Caltrans by Commission Resolution G-19-12 until all other non-SHOPP funds committed to the project have been expended.

34. Programming Escalations

Caltrans is responsible for applying escalations when recommending projects to the Commission for programming. The amount programmed for each project phase shall be escalated to the mid-point of the duration of each phase. The standard escalation rate shall be the rate specified in the last Commission adopted Fund Estimate for the SHOPP. Caltrans may elect to use alternative escalation factors as it deems appropriate.

VI. ALLOCATIONS

35. Safety Projects

Pursuant to Commission Resolution G-06-13 Caltrans may allocate up to 120 percent of the programmed construction funds to SHOPP safety projects. Caltrans shall bring forward for Commission consideration any safety project with a construction allocation greater than or equal to 120 percent of the programmed amount.

36. Emergency Condition Response Projects

Pursuant to Commission Resolution G-11-16 Caltrans is authorized to allocate funds for emergency condition response projects and associated right of way acquisition from appropriate state and federal fund sources to immediately perform emergency work on state-owned transportation facilities and property or related work in adjacent areas, with the understanding that these allocations will be amended into the SHOPP and reported to the Commission at its next meeting.

37. Minor Projects

Pursuant to Commission Resolution G-19-05, the Commission delegated authority to Caltrans for sub-allocations and/or adjustment authority to streamline and help in the management of minor projects. The Minor Reserve in the SHOPP is for SHOPP-eligible projects only that are consistent with the Commission adopted Transportation Asset Management Plan. The Commission will not allocate funds from the SHOPP minor program for enhancements, mitigation, or cost increases for STIP projects.

38. Allocation of Support and Construction Funds

Pursuant to Government Code Section 14526.5(g) the Commission is required to allocate Caltrans' capital outlay support resources by project phase, including preconstruction. Through this action, the Commission will provide public transparency for Caltrans' budget estimates, increasing assurance that the annual budget forecast is reasonable. The following applies to the Commission's allocations effective July 1, 2017:

- a. The Commission allocates the programmed support and construction capital funds for all projects listed in the SHOPP. This establishes the original allocation budget for each phase.
- b. The Commission will consider allocation of funds for a programmed project or programmed phase when it receives an allocation request and recommendation from Caltrans. The Commission will only consider an allocation of construction capital and/or construction support funds to projects that are ready to advertise.
- c. For ready-to-advertise projects, the Commission expects Caltrans to certify that a project's plans, specifications, and estimate are complete, constraints are cleared for environmental and right of way, and all necessary permits and agreements (including railroad construction and maintenance) are secured. These projects are considered Ready to List (RTL) by Caltrans.
- d. Projects not ready for advertisement will not be placed on the Commission's agenda for allocation approval.
- e. Unless otherwise approved by the Commission in accordance with the Timely Use of Funds provisions, all construction capital allocations are valid for six months from the date of allocation unless the Commission approves a contract award time extension.
- f. Unless otherwise approved by the Commission in accordance with the Timely Use of Funds provisions, all allocations for support are valid for six months from the date of allocation unless the Commission approves a project expenditure time extension.
- g. All allocations will be made in units of \$1,000, and all allocation requests shall therefore be in units of \$1,000.
- h. The allocation request will include a determination of the availability of funding and a recommendation on the source of funding. The recommendation on the source of funding shall include the amounts by fund account (i.e., State Highway Account, Public Transportation Account, Road Maintenance and Rehabilitation Account, or Federal Trust Fund) as well as the fund type within the account. Caltrans' recommendation to the Commission for state-only funding of a project will be made in accordance with Caltrans' current policy for exceptions to federal funding. The final determination of fund type available for a project will be made in the Commission's allocation of funds to the

- project. The Commission will approve the allocation only if the funds are available and are necessary to implement the project as programmed in the SHOPP.
- i. Pursuant to Public Resources Code Section 21102, the Commission may not allocate funds for design, right of way, or construction prior to documentation of environmental clearance under the California Environmental Quality Act (CEQA). For projects that are categorically cleared, a Caltrans determination of categorical exemption is acceptable. As a matter of policy, the Commission will not allocate funds for design, right of way, or construction of a federally funded project prior to documentation and/or determination as appropriate of environmental clearance under the National Environmental Policy Act (NEPA). Exceptions to this policy may be made in instances where federal law allows for the acquisition of right of way prior to completion of NEPA review and the project is not subject to CEQA or compliance with CEQA is achieved.
 - j. Each project's phase must be allocated on time consistent with the fiscal year programmed by the Commission. Scheduled fiscal year allocations must be completed no later than June 30th of each year.
 - k. Projects using design-build or design-sequencing procurement shall be identified at the time of allocation. If the procurement strategy is changed at a later date, the project shall be amended accordingly. The allocation may be a combined amount to include design, right of way, and construction support and construction.
 - l. If a project or project phase is ready for implementation earlier than the fiscal year that it is programmed in the SHOPP, Caltrans may request an allocation in advance of the programmed year. The Commission may make an allocation in advance of the programmed year if it finds that the allocation will not delay availability of funding for other projects.

39. Allocation of Right of Way Capital

Pursuant to Commission Resolution G-19-01, the Commission delegated authority to Caltrans for sub-allocations and/or adjustment authority to streamline and help in the management of right of capital. Annually, Caltrans will present for Commission review and acceptance a Right of Way Capital Plan. Only programmed projects may be included in the Right of Way Capital Plan. The annual right of way capital allocation will not exceed the amount programmed for capital project costs. Unprogrammed right of way commitments such as post-certification costs and inverse condemnation are funded through the right of way capital fund reservation established in the STIP Fund Estimate.

Prior to the approval of the environmental document, Caltrans is restricted from right of way expenditures with exception of the following activities that may occur during the PA&ED phase:

- Permits to enter
- Environmental permit fees
- Positive location of utilities
- Agreements for Railroad Coordination
- Preliminary title fees

Commitments related to the items listed above are limited to five percent of the overall amount approved in the Fiscal Year Right of Way Capital Plan.

Starting with projects that are programmed with right of way capital for Fiscal Year 2019-20 or later, projects with right of way capital programming of \$10 million or more must receive Commission approval for project level allocations prior to expenditure of funds. If a project that initially falls below this threshold increases to an amount equal to or exceeding the threshold requirement, an individual project allocation will be required. If a project is individually allocated and project development fees are expended prior to environmental clearance, those expenditures will be paid from Caltrans' sub-allocation.

Caltrans will provide the Commission with quarterly status reports on right of way capital plan expenditures. The report shall include a summary, by program, of the funds programmed, allocated, and expended. Changes to the allocation amounts for individual projects must be included in the quarterly report. Any project identified by Caltrans as needing right of way capital after the Commission acceptance of the Right of Way Capital Plan will need to be reported in the quarterly report, including information on how the additional right of way costs will be managed.

40. Allocation of Construction Management/General Contractor Projects

During the design phase, the Construction Management contract costs are considered design phase expenditures. Upon award of the construction contract, the contractor shifts to the General Contractor role, and expenditures will be reported as construction phase expenditures. The project will be allocated in the same manner as projects utilizing design-bid-build delivery, although flexibility in schedule, scope and cost may be requested and approved consistent with allocation and programming capacity, and timely use of funds rules.

To allow greater flexibility in the delivery of Construction Manager/General Contractor projects, the Commission will consider an amendment to segregate the project in the year of delivery into work packages. A list of the anticipated work packages and their delivery year must accompany the initial construction allocation request. Subsequent construction allocations must provide an updated list of the remaining anticipated work packages.

VII. MANAGEMENT & DELIVERY OF THE SHOPP

41. Scope, Cost, Schedule

Caltrans is responsible for managing the entire SHOPP portfolio of projects to meet the state's transportation needs and ensuring that each project is delivered within scope, budget, and schedule consistent with the Transportation Asset Management Plan and State Highway System Management Plan.

42. Management of Reservation Projects

Reservations established at Commission SHOPP adoption are managed on a fiscal year basis, where projects approved by the Commission for amendment in the SHOPP reduce the reservation amount. An increase or decrease to a reservation amount between programming cycles requires Commission action.

43. Management of Minor Projects

Pursuant to Commission Resolution G-19-05A, minor projects are managed on a fiscal year basis within a financially constrained annual minor program reservation. Caltrans is responsible for managing within the Commission approved annual minor reservation and assuring that all minor projects are awarded within the approved reservation by the conclusion of each fiscal year.

44. Stewardship

It is a Commission policy that all transportation funds programmed be allocated, awarded, and expended in a timely manner to ensure projects are delivered as promised, public benefits are achieved, the accumulation of excessive fund balances as well as lapsing federal funds are avoided, and performance from each dollar invested to improve California's transportation system is tracked and reported.

45. Timely Use of Funds for PA&ED, PS&E, and Construction Support Phases

The following requirements apply to timely use of funds allocated by the Commission for SHOPP PA&ED, PS&E, and Construction support phases:

- a. Funds that are programmed for these support costs are available for allocation only until the end of the fiscal year identified in the SHOPP. Whenever programmed funds are not allocated by this deadline, the project phase lapses and the phase will be deleted from the SHOPP, unless Caltrans requests an allocation time extension that is approved by the Commission before the end of the fiscal year. If the lapsed phase is critical to the delivery of the project, the project is considered a failed project and all unallocated phases will be de-programmed from the SHOPP.

- b. Funds allocated for the PA&ED and PS&E support phases must initiate expenditure within six months of the date of allocation unless the Commission approves a project expenditure time extension. Whenever allocated support funds have not initiated expenditure within six months of the date of allocation, these allocated funds will be rescinded.
- c. After the Commission's allocation for the PA&ED and PS&E phases, Caltrans has up to 36 months to complete the scope of work specific to that project phase. At the time of allocation, the Commission may extend the deadline for completion of work and the expenditure of funds, if necessary, to accommodate the proposed expenditure plan for the project.
- d. Funds allocated for construction support must initiate expenditure within one month after the award of the contract or these allocated funds will be rescinded. Caltrans has up to 36 months to complete the scope of work specific to that project phase. At the time of fund allocation, the Commission may extend the deadline for completion of work and the expenditure of funds, if necessary, to accommodate the proposed expenditure plan for the project. For the purpose of this section, the construction support phase is deemed to end at construction contract acceptance.
- e. Caltrans will provide a report at each Commission meeting on projects which have not started expending allocated support funds within four months of the date of the Commission's allocation.

46. Timely Use of Funds for Right of Way Support and Capital

The following requirements apply to timely use of funds allocated by the Commission for SHOPP right of way support and capital costs:

- a. Funds that are programmed for Caltrans' right of way support and capital costs are available for allocation only until the end of the fiscal year identified in the SHOPP. Whenever programmed funds are not allocated by this deadline, the project phase lapses and the phase will be deleted from the SHOPP, unless Caltrans requests an allocation time extension that is approved by the Commission before the end of the fiscal year. If the lapsed phase is critical to the delivery of the project, the project is considered a failed project and all unallocated phases will be de-programmed from the SHOPP.
- b. Funds allocated for right of way support and capital must initiate expenditure within six months of the date of allocation unless the Commission approves a project expenditure time extension. Whenever allocated right of way support or capital funds have not initiated expenditure within six months of the date of allocation these allocated funds will be rescinded.
- c. Right of way activities occur during the design and construction phases. To allow sufficient time for completion of work during these two phases,

after the Commission's allocation for right of way support or capital, Caltrans has up to 72 months to complete the scope of work specific to that project phase. This policy applies to right of way support or capital allocations that have occurred beginning with June 2017.

- d. At the time of allocation, the Commission may extend the deadline for completion of work and the expenditure of funds, if necessary, to accommodate the proposed expenditure plan for the project. Caltrans must submit justification for an extended timeline beyond the 72 months.
- e. Caltrans will provide a report at each Commission meeting on projects which have not started expending allocated support or capital funds within four months of the date of the Commission's allocation.

47. Timely Use of Funds for Construction Capital

The following requirements apply to timely use of construction capital funds allocated by the Commission for SHOPP projects:

- a. Funds programmed for Caltrans' construction capital costs are available for allocation only until the end of the fiscal year identified in the SHOPP. Whenever programmed funds are not allocated by this deadline, the project is considered a failed project and will be deleted from the SHOPP, unless the Commission approves an allocation time extension before the end of the fiscal year.
- b. Funds allocated for construction capital must be encumbered by the award of a construction contract within six months of the date of allocation unless the Commission approves a contract award time extension. The project will be deleted from the SHOPP if funds are not encumbered within approved deadlines.
- c. After the award of the construction contract, Caltrans has up to 36 months to complete (accept) the construction contract. At the time of fund allocation, the Commission may extend the deadline for completion of work and the expenditure of funds, if necessary, to accommodate the proposed expenditure plan for the project.
- d. Whenever allocated funds are not encumbered by the award of a construction contract or expended within the deadlines specified in section (b) above, all unencumbered or unexpended funds from the allocation will be rescinded for that project.
- e. Caltrans will provide a report at each Commission meeting on projects which have not been awarded within four months of the date of the Commission's allocation.

48. Timely Use of Funds – Extension

- a. Where a programmed project or project phase will not be ready for allocation as programmed in the current fiscal year, Caltrans shall

request an extension of the allocation deadline. In the event where a programmed project or project phase is not ready for allocation as programmed in the current fiscal year, Caltrans is prohibited from submitting a SHOPP amendment.

- b. The Commission may allow a one-time extension of up to 20-months for unforeseen and extraordinary circumstance beyond the control of Caltrans and only for the period of delay directly attributed to the extraordinary circumstance. Acceptable time extensions are identified as:
 - Allocation Time Extension
 - Project Expenditure Time Extension
 - Contract Award Time Extension
 - Completion Time Extension
- c. For right of way support and capital, the Commission may allow a one-time expenditure time extension for an unforeseen and extraordinary circumstance beyond the control of Caltrans and only for the period of delay directly attributed to the extraordinary circumstance.
- d. Except for the allocation of funds, the request to extend the deadline for any of the above must be received by Commission staff prior to the expiration date. For allocation of funds, the time extension must be approved by the Commission by June 30th of the year the funds are programmed, otherwise the funds will lapse.
- e. The extension request should describe the specific circumstance that justifies the extension and identifies the delay directly attributable to that circumstance.

VIII. CHANGE MANAGEMENT

49. Introduction

During the project development process, changes to a programmed project might be necessary to update project phases and to realign a project to meet its objectives and goals. Caltrans is responsible for adjusting and managing project programming changes efficiently. Depending on the circumstance, Caltrans has a number of options available that include: managing each SHOPP project within its delegated authority or allocation, updating the programmed cost through project amendments, and supplemental allocations.

- a. Supplemental Allocations. Once allocated, projects that experience increases in capital or support costs above the amounts in the Commission's allocation and above Commission established thresholds shall require a supplemental project allocation. Caltrans shall, for each project requiring a supplemental project allocation, submit a detailed

request to the Commission for its approval.

- b. Construction. The costs programmed and allocated for Caltrans construction projects are to be based on the engineer's final estimate presented to the Commission for an allocation vote. For allocation requests equal to or greater than 120 percent of the programmed amount, Caltrans shall submit a detailed request to the Commission for its approval.
- c. Support. The costs programmed and allocated for Caltrans support is the amount identified and presented to the Commission for allocation. For allocation requests equal to or greater than 120 percent of the programmed amount, Caltrans shall submit a detailed request to the Commission for its approval.
- d. No adjustments to support or construction capital will be made by Caltrans beyond the authority delegated by Commission Resolution G-19-12.
- e. Changes to project outputs must be approved by the Commission.
- f. The Commission will not amend the SHOPP to change the program year of the funding or the funding amount for any project phase programmed in the current fiscal year except to reprogram funds from a construction project to later mitigation work required for that project, including landscaping or mitigation. The Commission will consider the amendment only if it is proposed concurrently with an allocation of funds programmed for the project in the current fiscal year. These types of amendments are adjustments that may be incorporated into the Commission's allocation action.

50. Managing Within the Commission's Delegated Authority

Pursuant to the Commission Resolution G-19-12, the Caltrans Director is delegated authority to increase the Commission-approved project phase values within pre-established thresholds.

51. Changes via Commission Amendment

Any programmed, unallocated project phase may be updated before the year of delivery of that phase via a Caltrans amendment request. Except for updates necessary at the end of the PA&ED or PS&E phases, only updates for unforeseen and extraordinary circumstances beyond the reasonable control of Caltrans will be considered. A Commission action is needed to amend the project. The Commission encourages Caltrans to implement and recommend procedures that streamline the amendment process and enhance accountability.

52. Changes to Projects in the SHOPP Document

Every two years, with the adoption of the new SHOPP document, project components listed in the SHOPP must be updated, consistent with the

TAMP, with its most current estimate so long as that component has not received an allocation of funds. Once allocated, the component must be managed by Caltrans consistent with Commission Resolution G-19-12 parameters. Any project component that has expended its allocation plus its G-19-12 authority must receive a supplemental allocation of funds from the Commission. Caltrans is responsible for implementing a change management process to manage and document the SHOPP cycle changes internally. These SHOPP changes must be identified, documented, and finalized by January of each even year.

53. Pre-Apprenticeship Training Program

Pursuant to Streets and Highway Code Section 2038, by July 1, 2023, the California Department of Transportation when receiving Road Maintenance and Rehabilitation Account funds must follow the guidelines developed by the California Workforce Development Board that address participation and investment in, or partnership with, new or existing pre-apprenticeship training programs.

IX. REPORTING & ACCOUNTABILITY

54. SB 1 SHOPP Baseline Agreements

The Road Repair and Accountability Act of 2017 (Senate Bill 1, Chapter 5, Statutes of 2017) states that "it is the intent of the Legislature that the Department of Transportation and local governments are held accountable for the efficient investment of public funds to maintain the public highways, streets, and roads, and are accountable to the people through performance goals that are tracked and reported." Pursuant to the Commission-adopted SB 1 Accountability and Transparency Guidelines, SHOPP projects that meet certain requirements will be subject to the following: front-end, in-progress, and follow-up accountability requirements. For additional details related to accountability requirements, refer to the Commission's SB 1 Accountability and Transparency Guidelines.

- a. SB 1 SHOPP Baseline Agreements are required for projects with a total project cost of \$40 million or greater adopted in the 2018 SHOPP and subsequent program amendments and adoptions. This requirement is retroactive to July 1, 2018.
- b. If a project that initially falls below the threshold listed above later increases to an amount equal to or exceeds the threshold requirements, an SB 1 SHOPP Baseline Agreement will be required.
- c. Each Baseline Agreement shall be signed by the District Director, the Department's Director, and the Commission's Executive Director.
- d. The Department shall request the Commission to approve all SB 1 SHOPP Baseline Agreements at a regular Commission meeting, within two meetings after a project has achieved the PA&ED milestone.

- e. SB 1 SHOPP Baseline Agreements will not be required for SHOPP Emergency Response projects that are necessary to respond promptly to damages to the state highway system caused by floods, slides, earthquakes, fires, and other significant events.

55. Report on Targets and Performance Measures

- a. Pursuant to Government Code Section 14526.7(b) and Streets and Highways Code 2032.5, Caltrans shall report annually to the Commission on its progress toward meeting the targets and performance measures consistent with the Transportation Asset Management Plan and 2027 targets set forth in SB 1. Caltrans will provide the Commission with the report no later June 1.
- b. Annually, the Commission shall evaluate the effectiveness of Caltrans in reducing deferred maintenance and improving road conditions on the state highway system, as demonstrated by the progress made in achieving 2027 targets/goals set forth in SB 1 and the Commission's adopted targets.
- c. The Commission may make recommendations for improvement and may withhold future project allocations if it determines program funds are not being appropriately spent.
- d. The Commission shall include any findings in its annual report to the Legislature pursuant to Government Code Section 14535.

56. Report on SHOPP Projects

Caltrans will provide the Commission with quarterly status reports on its project delivery by November 15, February 15, May 15, and August 15 of each fiscal year.

Pursuant to Government Code Section 14526.6 Caltrans shall report to the Commission quarterly, for projects which complete construction in the previous quarter, for all major SHOPP projects. The report shall include a list of completed projects with the following information:

- a. Project identifier.
- b. The location and type of work.
- c. By phase, the funds initially programmed, allocated, and expended.
- d. Planned project outputs at programming, construction allocation, and actual outputs at the time the construction contract was accepted.
- e. Date construction contract was accepted (CCA).
- f. Useful life of the project's primary output.
- g. Additionally, the report shall include a section that provides a narrative for projects with a change in project outputs between construction allocation and CCA that explains reasons for the change and any costs

associated with the change.

57. Efficiencies

Pursuant to Streets and Highways Code section 2032.5(d), Caltrans shall implement efficiency measures with the goal to generate at least \$100 million per year in savings to invest in maintenance and rehabilitation of the state highway system. These savings shall be reported annually, in writing, to the Commission by November 1st.

X. APPENDICES

58. Appendix A: Index of Acronyms

CEQA	California Environmental Quality Act (State)
CTIPS	California Transportation Improvement Program System
FSTIP	Federal Statewide Transportation Improvement Program
FTIP	Federal Transportation Improvement Program
GARVEE...	Grant Anticipation Revenue Vehicle
NEPA	National Environmental Policy Act (Federal)
PA&ED	Project Approval and Environmental Document
PS&E	Plans, Specifications, and Estimate
RTL	Ready to List
SB	Senate Bill
SHOPP	State Highway Operation and Protection Program
STIP	State Transportation Improvement Program
TAMP	Transportation Asset Management Plan

59. Appendix B: Statutory References

The SHOPP Guidelines were developed and adopted consistent with:

- a. Governor's Executive Orders, where applicable.
- b. Government Code Sections 14526.4, 14526.6; 14526.5, 14526.7.
- c. Streets and Highways Code Sections 164.6 and 167.
- d. Public Resources Code Section 21102
- e. The Road Repair and Accountability Act of 2017, SB 1, (Beall, Chapter 5, Statutes of 2017);
- f. Commission Resolutions including, but not limited to: G-00-13, G-19-01, G-19-05A, G-06-13, G-11-16, and G-19-12.
- g. Commission approved actions specific to the Asset Management Plan on March 26, 2015 (Tab 26) regarding four asset classes.
- h. Current best management practices including those related to the STIP and its authorities in accordance with Government Code Section 14530.1.
- i. Compliance with all Federal and State requirements.
