<small>The State of California or its officers or agents shall not be responsible for the accuracy or completeness of scanned copies of this plan sheet.</small>					
<small>The Registered Civil Engineer for the project is responsible for the selection and proper application of the component design and any modifications shown.</small>					

**NOTES:**

- Counter slopes of adjoining gutters and road surfaces immediately adjacent to and within 24 inches of the curb ramp must not be steeper than 1:20 (5.0%). Gutter pan slope must not exceed 1" of depth for each 2" of width.
- Needed only when exist/new sidewalk cross slope is steeper than 1.5%. If transition pad is needed, then the barrier transition will start at the end of the transition pad and not at the end of ramp.
- Curb ramps must have a running slope not steeper than 7.5% maximum.
- Transitions from ramps and landing to walks, gutters or streets must be flush (no lip) and free of abrupt changes.
- Curb ramps must have a detectable warning surface that extends the full width and 3'-0" depth of the ramp. Detectable Warning Surfaces must conform to the details on this plan and the requirements in the Standard Specification.
