

Lake 20/29 Intersection Safety FACT SHEET

The Project

This project proposes to improve the safety of the Route 20/29 intersection by constructing a roundabout. The historic collision rate at this intersection is 3.7 times higher than the statewide average for similar intersections. The project is located near the town of Upper Lake in Lake County.

Benefits

The roundabout will improve safety by reducing the number and severity of collisions. Sidewalks will be provided and drainage will be enhanced. Median islands near the roundabout will provide refuge for pedestrians, allowing them to cross one direction of traffic at a time.

Status

The final environmental document is complete. Project plans are being developed.

Costs

The total project cost at completion is estimated to be \$6.2 million.

Schedule

Begin Construction: Spring 2014
Project Completion: Winter 2014
