TOTAL =					\$ 780,979.88

Note: Items may not be split out from above scope

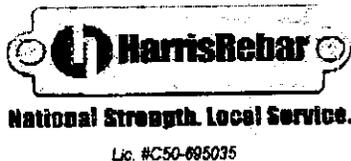

Note: Above prices are based on continuous drilling and final quantities shall be measured and agreed upon in the field by the GC and DTDS. Contractor to have a minimum of 250' of wall excavated and ready for drilling daily (5 days a week), ready each day to drill (this represents how much should be available, or out ahead of DTDS to drill, not a production schedule).

Note: For the upper lifts where creating a bench is difficult, DTDS can operate off of the existing roadway and "reach up" and drill the soil nails. This will require to Contractor to cut into the toe of the slope to allow the drill to get as close as possible to the wall face. DTDS will use manlifts to access the upper 2 or 3 rows of nails and shotcrete. The lower nails (below upper 2 or 3 rows) will still be drilled from the existing roadway by "reaching up", but the Contractor shall pioneer an access road/bench (most likely to be used for excavation) that will be available for DTDS crew to work off. Again, this is not a drill bench because DTDS will drill from roadway.
