city: Woodland

state: CA

comments: The California Short Line Railroad Association (www.cslra.org) is in support of the California Transportation Plan, CTP 2040. We would encourage the plan to include a program to provide funds for our small railroads in order to upgrade our rail infrastructure, increase our capacity which would result in reducing the amount of trucks on the highway. We are an energy efficient and low emission form of transportation located throughout the State of California. Funds supplied to the short line railroads will result in an increase in local jobs to the communities served by the railroads.
