6 \$1,250,000 Siskiyou 02U-Sis-96 33.2	Near Happy Camp, 1 mile west of Wingate Maintenance Station. Heavy rain in December 2010 and February 2011 caused a landslide to occur at this location resulting in road closure. Subsequent inspection of the site revealed that 2,500 to 3,000 cubic yards of slope material have become unstable. Initial allocation is to remove unstable portion of the slope, scale any remaining rocks and loose material, and construct benches and catchment areas. The supplemental allocation is due to recent heavy rain causing the expansion of the slide and resulting in an increase in the number of work days, and the need for additional equipment and traffic control. This project is to construct a retaining wall and install horizontal drains to support the roadway and reduce the saturated conditions. Additional work includes paving, paving markers, metal beam guardrail and traffic control. This project is to reconstruct the failed slope with rock slope protection, repair the section of culvert that separated, replace a failed section of asphalt concrete, and place erosion control as necessary. At PM 4.83, the pavement dropped one foot and the southbound lane is closed. At PM 4.88, roadway is showing signs of instability. A smaller slip-out occurred at PM 5.35 with loss of shoulder during the February storms. This project is to construct Cast in Drilled Hole (CIDH) piles at the first two locations and install rock slope protection at the third. A roadway detour will be put in place and maintained during highway closure. Further investigation revealed large voids under the pavement caused by two failed 24-inch corrugated metal pipe (CMP) drainage culverts. This project is to dig out the failed sections of CMPs and replace with reinforced concrete pipe (RCP), and repair, and repave the roadway. A project currently in the design phase is being expedited to replace other deteriorated culverts discovered nearby. 17 \$300,000 San Bernardino 08U-SBd-Var Various	In San Bernardino and Riverside Counties on various highways, at various locations. Rising market price of copper is resulting in the theft of installed wiring along the state highway system. Removed wiring caused electrical systems, including lighting, traffic signals, and changeable message signs to stop working at various locations. The impact to the travelling public includes reduced decision sight distance, decreased nighttime visibility, and increased risk of accidents. This project is to replace damaged electrical systems by installing hardened armored access boxes and pull box covers, locking wires to conduits, and burying pull boxes.
