

Summary of Actions taken by the CA Traffic Control Devices Committee (CTCDC) during the March 5, 2015 Meeting

14-05 Bicycle Signal Faces – CA MUTCD edits - **No action taken**

Action: The Committee recommended bringing the item back at a future meeting.

There were several last-minute changes made to the agenda item and the committee felt uncomfortable taking an action without having time to thoroughly review the changes.

15-01 Proposal to modify CTCDC meeting format - **New format supported**

Action: The Committee recommended adopting the format with minor corrections. For agenda items that require an action vote and are considered simple with little discussion, include these in the Consent group (and not require to be brought back at a subsequent meeting for an action vote). The Committee suggested updating the CA MUTCD annually.

15-02 Request for opinion on whether new legislation is necessary in order to experiment with HOV/Express lane striping. – **Recommended with minor edits**

Action: The Committee's opinion is that CVC 21460 does not need to be altered. CVC 21655.8 will require minor editing to include language on the proposed striping configuration. The Committee also agreed that a pilot study may proceed and a formal request for a pilot study be submitted at the next CTCDC meeting.

15-03 CA MUTCD edits in Sections 2B.54, 2C.37, 4D.27, 4E.08, 4I.03, 4N.02 – **Item withdrawn**

Action: This item was not discussed, as it consisted of information that was previously discussed and approved, as well as minor CA MUTCD edits that do not require an action by the Committee.

15-04 Coachella Valley NEV Plan and associated TCDs – **Approved with minor edits**

Action: Approved signs:

NEV PARKING ONLY (sign designation TBD)

NEV – BIKE USE PED SIGNAL (R9-XX(CA))

NEV – BIKE LANE (sign designation TBD)

NEV PROHIBITED (sign designation TBD)

BEYOND THIS POINT plaque (plaque designation TBD)

EXCEPT NEV – BIKE (sign designation TBD)

NEV ROUTE (sign designation TBD)

NEV – BIKE- LANE stencil to be included in CA MUTCD, specific location TBD.

Enhancements with CV Link markings are not considered a traffic control device and as such the committee did not have a recommendation on this part of the proposal.

15-05 Proposed update for “Construction Funding Identification Sign” - **Approved 9:1**

Action: Approved sign to be included in the CA MUTCD

15-08 Modify CA MUTCD Section 6F.01 to include Manual for Assessing Safety Hardware (MASH) criteria - **Approved 9:1**

Action: Approved changes with minor edits.

15-09 Request Experimental status for parking sign redesign pilot - **Approved 9:1**

Action: Approved to conduct Phase I of this pilot project. Phase II components were not discussed in sufficient detail to warrant a vote.
